ACKNOWLEDGMENTS

The most pleasant duty in a work like this is to remember, record and reiterate my obligations to all those who have made its completion possible.

I wish to express my gratitude for the untiring help, astute and unfailing scrutiny and constant supervision provided by my esteemed teacher Dr. B.N. Misra, M.D., during the entire period of study. Things that I have learnt from him will take me a long way in my career. He has not only been a help in my thesis, but a memory that would be everlasting.

My association with Professor R.C. Agrawal, M.D., has been a sure privilege. My indebtedness to him can not be contained in mere words. His constant inspiration, encouragement and wise suggestions have brought this work to the light of the day.

I am filled with deep sense of obligation towards Dr. L.D. Joshi, M.S., M.C.R., J.B., for the invaluable guidance provided by him in the mechanical aspect of this work. My thanks are also due to Dr. P.K. Jha, M.D., M.R.A., for his constructive criticisms throughout the period this work was in progress. May I take this opportunity to express my deep sense of gratitude to Dr. G.B. Bhatia, M.D., and Drs. Babu Verma, their painstaking efforts and timely advice has proved invaluable in the completion of this dissertation.
I sincerely acknowledge the help provided by Mr. Bal Mukund Shama for assisting in technical aspects of this work.

Mr. Siddiqui Ali deserves a word of thanks for his patience and skill in bringing out a neat typescript.

20th May, 1981.

(WADHUKAR MISRA)
