Acknowledgements

First of all, it is a great pleasure for me to have got an opportunity of working in the field of molecular spectroscopy and astrophysics in general and in the area of my work in particular.

I would like to express my deep and sincere gratitude to my Guru, Mentor, Guide and Supervisor Dr. N. RAJAMANICKAM. His wide knowledge and his logical way of thinking have been of great value for me. This thesis would not have been possible without the expert guidance of him, as he always read and responded to the drafts of each chapter of my work more quickly than I could have hoped. His aspiration to bring out an outstanding research work has always been a source of inspiration for me. It is a great experience to work with the legend like him. Apart from research, I got lot of valuable guidelines from my Guru.

I am deeply grateful to my Co-Guide, Prof. S.P. BAGARE, for his detailed and constructive comments, and for his vital support throughout this work. I deem it a great pleasure in expressing my thanks to him for his continuous support and encouragement extended generously in all ways. He gave me a broad perspective in the field of Astrophysics. His oral and written comments are always extremely perceptive, helpful and encouraging.

Dr. V. Raja, Mr. R. Shanmugavel, Mr. P. Sri Ramachandran and Dr. K. Balachandra Kumar are thanked for numerous stimulating discussions, valuable advice and for their friendly help. My enormous debt of gratitude can hardly be repaid to Dr. V. Raja who not only proof-read multiple versions of all the chapters of
this thesis, but also provided many stylistic suggestions which help me to improve my presentation.

I wish to thank Mr. A.K. Muthusamy, Lecturer in English, VHNSN College, for revising the English of my manuscripts and thesis.

Many people on the Management and on the teaching & non-teaching staff of the VHNSN College who assisted and encouraged me in various ways during my course of studies are thanked.

I thank the Government of TamilNadu for the award of a research fellowship (2004-2006) which enabled me to carry out the research work successfully. I am also gratefully acknowledging the University Grants Commission for a project fellowship (2006-2007).

I would like to thank all the staff members of IIA, Kodaikanal & Bangalore for rendering all the help I required.

This acknowledgement would be incomplete without mentioning MY PARENTS. The love of my father, mother, brother and sisters gave me the strength and stood in good stead. Without their encouragement and co-operation, this thesis would not have seen the light of the day.
