LIST OF TABLES

TABLE

Table 2.1: Global Growth Rates for Outputs of Different Agricultural Commodities ................................................................. 22

Table 2.2: Strategic Responses to Standards ........................................ 41

Table 3.1: Certified Organic Land by Country (Hectares) ....................... 66

Table 3.2: Status of Organic Agriculture Regulations across Regions by October 2003 and in 2005 ................................................................. 71

Table 3.3: Organic Regulations by Continent as at 2007 ......................... 72

Table 3.4: Certification Bodies by Continent: 2003 -2007 ....................... 75

Table 4.1: Relative Importance of Sub Sectors to Agriculture .......... 93

Table 4.2: Proportions of Households Growing Various Crops in 2005 ...... 94

Table 4.3: Proportion of Selected Inputs to Total Material Inputs: 1999-2006 109

Table 4.4: Percent of Small Scale Households Using Fertilizer by Region 112

Table 4.5: Fertilizer Application Levels in Kenyan Smallholder Farms ...... 113

Table 4.6: Proportions of Parcels Using Fertilizers by Region in 2005-06 114

Table 4.7: Proportions of Parcels, under Irrigation and Livestock Ownership. 115

Table 5.1: Leading Organizations Promoting Organic Agriculture in Kenya . 132

Table 5.2: Types of Organic Techniques and Practices in Kenya .............. 141

Table 5.3 Uncertified Organic land, Trained Farmers & Adoption Estimates. 146

Table 5.4: Organic Products across Provinces ...................................... 147

Table 6.1: Crop production, Population, land, fertilizer use and Kales Production across Districts in Central Province as in 2007 ......... 160
Table 6.2: Composition of Organic and Non-Organic Farmers across Districts ................................................................. 170
Table 6.3: Composition of Organic and Non-Organic Farmers by District and Gender .......................................................... 171
Table 6.4: Distribution of Organic Farmers by Land Size and Number of Techniques ........................................................................ 172
Table 6.5: Percentage Distribution of Initial Source of Organic Information .................................................................................. 182
Table 6.6: A Chi Square Distribution of Initial Organic Information across Adoption Status ................................................................. 185
Table 6.7: Percentage and Chi Square Distribution of Sources of Market Information ....................................................................... 188
Table 6.8(a): Distribution of Organic Techniques among Adopters across Districts ................................................................. 191
Table 6.8(b): Distribution of Organic Techniques among Non adopter across Districts ........................................................................ 192
Table 6.9: Distribution of Farmers Growing Key Crops across Districts .................................................................................. 197
Table 6.10: Average Gross Earnings by Adoption Status in Kenya Shillings ................................................................................. 200
Table 6.11: Summary Statistics of Farm Gross Earnings by Crop and Adoption ................................................................................. 201
Table 6.12: Average Vegetable Income, Variable Cost, Gross Value of Output per Acre in Kshs by Crop and Adoption Status ........................................................................ 203
Table 6.13: Percentage Distribution of Earnings by Adoption: High Profit Medium Profit and Low Profit ........................................................................ 206
Table 6.14: Average Net Gross Earnings in Kshs by Size of Operated Land .................................................................................. 208
Table 6.15: Mean and Share of Input Costs per Acre by Adoption Status .................................................................................. 210
Table 6.16: Average Input Costs of Crop Cultivation by Crop and Adoption Status ................................................................................. 210
Table 6.17: Average Farm Earnings by Decile Groups of Sampled Farmers .................................................................................. 212
Table 7.1 Definition of Variables ......................................................................................................................................................... 229
Table 7.2: Summary Statistics by Adoption Status ........................................................................................................................................ 231
Table 7.3: Multinomial Logit Adoption Model ........................................................................................................................................ 238
Table 7.4: First Stage Results for Information Acquisition ........................................................................................................................................ 244
Table 7.5: Probit Results for Adoption of Organic Agriculture ........................................................................................................................................ 245
Table 7.6 Description of Variables used in the Joint Analysis ........................................................................................................................................ 257
Table 7.7: Descriptive Statistics for Output Value per Acre, Land in Acres and Expenditure on Inputs per acre in Kenya ........................................................................................................................................ 268
Table 7.8a MLE for Stochastic Frontier Model for Cabbage ........................................................................................................................................ 262
Table 7.8b MLE for Stochastic Frontier Model for Kales ........................................................................................................................................ 263
Table 7.9 Distribution of Predicted Technical
