ACKNOWLEDGEMENTS

The author is indebted to Prof. M. Rangacharyulu for kindly suggesting the problem, for his inspiring guidance and encouragement throughout the progress of this work, without whose help this work could not have taken this shape.

He is highly grateful to Prof. P. Narayana Murty, Head, Dept. of Physics and Electronics, Acharya Nagarjuna University Campus College for providing department facilities for conducting research work. The author also conveys his sincere thanks to Prof. S. Sreehari Sastry for sparing his valuable time for useful discussions during the progress of the work.

He expresses his gratitude to Dr. D. Krishna Rao, Associate Professor of campus college for his support in research work.

The author is thankful to Prof. N. Veeraiah, Dept of Physics, A.N.U. P.G. Centre, Nuzvid, for his encouragement.

The author expresses his heart felt gratitude to Dr. R.V.S.S.N. Ravikumar, Asst. Professor in Physics and Asst. Coordinator to TePP Outreach Centre, DSIR, Acharya Nagarjuna University Campus, for kindly helping in recording optical absorption spectra and also for his help in analyzing various spectra.
The author is thankful to Dr. M. Rami Reddy and Dr. C. Sandhya Asst. Professors of our department for their encouragement and useful discussions in various stages of work.

He conveys his special thanks to Dr. Ch. Linga Raju Asst. Professor for his help in computational work.

He expresses his gratitude to Dr. R. Ramesh Raju Asst. Professor, Dept. of Chemistry, Campus college, A.N.U., for his help in collecting literature.

The author is indebted to Prof. P. Sambasiva Rao Department of Chemistry, Pondicherry University, Puducherry, for his help in computational work.

The author conveys his sincere thanks to The Director, Centralised Laboratory, Acharya Nagarjuna University Campus for permitting to use the central lab facilities.

He expresses his thanks to The Director, Central Facility, Dept. of Physics, Indian Institute of Science, Bangalore, for kindly allowing him to take the X-Ray Diffraction measurements of the samples.

The author expresses heartfelt thanks to The Dean, Central Instrumentation Laboratory, University of Hyderabad, Hyderabad, kindly allowing him to take the Electron Paramagnetic Resonance spectra recordings of the glass samples.
The author expresses his sincere appreciation and heartfelt thanks to Smt. & Sri. A. Radha Krishna Murthy for their valuable cooperation and hospitality during the preparation of the thesis.

He is very much thankful to his co-scholars Smt. R. Kameswari, Mr. M.V.V.K. Srinivas Prasad, Ms.K.Vijayalakshmi and Sri.G. Srinivas, for their cooperation and help during the course of this work.

The author expresses his sincere thanks to Mr. L. Rajesh Babu (Ph.D) (USA), for his constant encouragement in this work.

The moral support and encouragement of Mr. M. Sasi Bhushan, Mr. K. Madhu and all other friends are gratefully acknowledged.

The help extended by Mr. A. Srinivasa Rao and all other non-teaching members of our Physics & Electronics Department, campus college is acknowledged.
