I express my profound sense of gratitude and indebtedness to my esteemed Research Director Dr. B. Gaga Rao, University College of Pharmaceutical Sciences, Andhra University, and Visakhapatnam for suggesting the topic and his valuable guidance, immense support, useful criticism and incessant encouragement throughout the course of this project.

I express my sincere thanks and respect to Prof. K.P.R. Chowdary, Principal, and University College of Pharmaceutical Sciences, Andhra University, and Visakhapatnam for his support, encouragement, affection and providing research facilities.

My sincere thanks to Prof. K.R.S. Samba Siva Rao, coordinator, centre for Biotechnology, Acharya Nagarjuna University, Nagarjuna nagar for the kind co-operation extended to me. I also extend my heartfelt thanks to all co-research scholars and supporting staff that have helped directly or indirectly towards the completion of my thesis work.

My special thanks are to Prof. M. Venkaiah. Department of Botany, J.V.D. College of Science and Technology, Andhra University and to Dr. P. Daniel, coordinator, Botanical Survey of India, Coimbatore for identifying and authenticication of plant material. My special thanks to M. Sanjith Nath for his support, encouragement and assistance.
I am always in great debt to my beloved wife Manju Latha for her constant inspiration, forbearance and to my daughters Blessy and Nissy. Completing a thesis of this nature would not have been possible without the physical, mental support from my friends and family members.
