ACKNOWLEDGEMENT

It is a pleasure for me to express my feelings of deepest gratitude and thankfulness to my esteemed and learned guide Dr. Rajesh Sharma, Department of Mathematics, Himachal Pradesh University, Shimla-171005. To me as per Indian culture and tradition, he reserves a place of Guru who plays a role of God for his student and without whose guidance, valuable suggestions, encouragement, care and concern one cannot achieve the goal-striven for, and for me my work was never complete, without his useful advice and blessings for which I shall always remain indebted to him. He has been very accommodating, affectionate and sympathetic in his attitude towards me during the tenure of this investigation. I feel fortunate enough to have had the opportunity to work under his expert supervision.

I wish to extend my warmest thankfulness to the Chairperson Dr. J. R. Gupta, Department of Mathematics. I am also thankful to Teaching and non-teaching staff of Mathematics Department for their constant support to me.

No expression of gratitude will be sufficient without recognition and contribution of Baba Ji for his blessings, selfless persuasion and inspiration that ultimately helped me to undertake this endeavour.

I express my heartiest and sincerest gratitude to my parents, brothers and all the family members for their ceaseless inspiration, timely guidance, ever fresh encouragement, blessings, everlasting affection which enable me to undertake and do justice to this gigantic and scholarly assignment.

Words fail to adequately express my failings towards my friends, seniors and juniors who cooperated with me during the hours of need.

I am indebted to the Chairman, Principal, Colleagues and my students of Green Hills Engineering College, Kumarkhati, Solan for bearing with me in my engrossing occupation with my studies.

Lastly, I must thank Mr. Arvind for his valuable help in typing this thesis painstakingly and meticulously in the least possible time.
