ACKNOWLEDGEMENT

Writing a doctoral thesis has been a complex and inquisitive process and the final result is a synthesis of the ideas of many minds. My simple role has been to assemble and reorganize the ideas of many professors, teachers, researchers, well-wishers, friends and relatives who deserve gratitude for successful completion of my Ph. D. thesis.

First of all I express my deep sense of gratitude and thanks to my supervisor and revered guide, Prof. (Dr.) Manoj Kumar Hota, M.Sc. Ph.D. for his valuable guidance, constant encouragement and support during this research work. Without his active cooperation and generous help this thesis wouldn’t have been able to see the light of the day.

I express my deep sense of reverence to the departed soul of my father Late Sisir Kumar Mohanty for his Love and Blessings. I am very indebted to my mother Mrs. Pramila Mohanty, whose blessings have done a lot to me.

I am also grateful to the esteemed KIIT University, Founder of KIIT University Dr. A. Samanta, Vice Chancellor Prof. (Dr.) P. P. Mathur and Head, Research Chair Prof. S. Nanda for granting me permission to undertake this research work and for their ever encouraging attitude.

I have been profited from criticism and encouragements by quite a large number of friends and research scholars in the Department of Mathematics, KIIT University, Bhubaneswar and I express my sincere gratefulness to all of them.

I record my debt to my wife, Rashmi(MITI) for her unflinching help and sacrifice far beyond the call of conjugal duty for going ahead in my research work. I also feel indebted to my son Bapani, who continuously felt my detachment towards him during my research work.

Prasanta Kumar Mohanty
