ACKNOWLEDGEMENT

At the outset, I feel it my moral duty to bow my head before the Almighty ALLAH for the blessings, strength, endurance and perseverance He has granted to me during the whole period of my research activities.

I would like to extend my gratitude to many people who helped to bring this research project to fruition.

The accomplished research work was documented under the kind-hearted approach, vigilant tracking, erudite analysis and liberal supervision of Prof J P Singh Joorel, Dean of the Faculty of Mathematical Sciences, University of Jammu. His meticulous scrutiny and precise appraisal enhanced the worth of this manuscript. This feat was possible only because of his valuable guidance, scholarly inputs, unconditional support I received throughout the research work. You have been an ever beacon of support, encouragement and advice.

I equally reiterate my gratitude and indebtedness to Prof Rahul Gupta. Head of the Department of Statistics, University of Jammu, for his valuable help, generous affection and constant encouragement to learn new things in academics.

I am highly thankful to Dr Pawan Kumar, Associate Professor, Department of Statistics, University of Jammu, for his guidance, affectionate advice and valuable discussions. His professional veracity and precious propositions will always be with me right through the course of my life.

Thanks must also go to Dr Parmil Kumar and Dr V K Shivgotra. Faculty members of the Department of Statistics, University of Jammu, for their helpful suggestions, support and guidance as and when required during the course of work.
I would like to express my full appreciation to Non-teaching Staff, Departmental Library, University of Jammu for providing requisite literature/material and infrastructural facilities.

My indebtedness to my parents Dr Bashir A Rather and my mother Ms Zytoona Bashir is beyond expression who taught me to study hard and to give priority in my life to the quest for knowledge. Their blessings, love, encouragement, moral support and timely guidance are the biggest source of inspiration throughout my carrier life. Thanks are equally due to my dear uncle Dr Mehraj uddin Rather for his esteemed encouragement and support during the course of my research studies. My heartfelt regards to them for all the sacrifices they have made for me despite various odds and evens faced during my academic carrier. Their prayer for me was what sustained me where I stand today. I dedicated this piece of work to them as a token of love and affection.

I am fortunate enough in having Anisa Bashir, Nafeesa Bashir and Bushra Bashir as my sisters who have been ever encouraging in the journey of my life. Sisters are the escalators that make the climb easier. You all deserve my whole hearted thanks as well.

I cannot help myself to have a word of gratitude for my friends Ranjeet Kour and Shivani Chaudhary for their ever encouraging support, consistent help and personal efforts in compiling the thesis. It will be unpardonable if I don’t acknowledge the encouragement and help giving to me by my senior research colleague namely Ruhi Chaudhary. Thank you all for your understanding and encouragement in many moments of crisis. I cannot list all the names here but you are always on my mind. Your friendship makes my life a wonderful experience.

Last but not the least, I express my thanks to all those whose names could not be mentioned here for their lot of co-operation in this endeavour.

Raeesa Bashir
