# LIST OF TABLES

2.1 Decennial Growth of Population – Chennai  
2.2 Population and Residential Density - Chennai  
2.3 Total Population to Slum Population - Chennai  
2.4 Residential Density Per Square Kilometre – Slum / Zones  
2.5 Urban Activities along Waterways  
2.6 Outfalls in the Waterways  
2.7 Quantity of Industrial Effluents / Day  
2.8 Water Sample Collection Stations  
2.9 Surface Water Quality  
2.10 Air Pollution and Human Health  
2.11 Ambient Air Quality – Chennai  
2.12 Ambient Noise Level- Chennai  
2.13 Ambient Noise Level Standards  
2.14 Environmental Quality Rating System  

3.1 Spatial Distribution of Dominant Waste Generating Activities (%)  
3.2 Residential Solid Waste Generation (in Tonnes)  
3.3 Residential Waste – Generation Rate  
3.4 Number of Slums & Quantity of Waste Generated  
3.5 Commercial & Institutional Waste Generation  
3.6 Estimated Quantity of Waste Generated By Commercial Units  
3.7 Hazardous Industrial Pollutants  
3.8 Hazardous Industrial Units & Waste Generation  
3.9 Medium & Small Industries - Waste Generation  
3.10 Estimated Quantity of Bio-Medical Waste Per Day  
3.11 Bio-Medical Waste – Government Hospitals  
3.12 Bio- Medical Waste – Health Centres  
3.13 Bio- Medical Waste - Private Hospitals  
3.14 Bio-Medical Waste – Generation Rate  
3.15 Hazardousness Index  
3.16 Ratio of Waste Concentration to Landuse  
3.17 Landuse & Waste Generation Typology  

4.1 Sanitary Workers  
4.2 Performance Rate of Sanitary Workers  
4.3 Absenteeism among Sanitary Workers ( Average / Day )  
4.4 Deployment of Light Vehicles
4.5 Deployment of Heavy Vehicles
4.6 Number of Netted and Un-netted Vehicles – Kodungaiyur
4.7 Installation Cost Incinerators
4.8 Required Manpower to Existing Manpower
4.9 Optimum Clearance by Sanitary Workers
4.10 Communal Dust Bins Requirement
4.11 Masonary Dust Bins Requirement
4.12 Carrying Capacity Heavy Vehicles
4.13 Light Vehicles – Required & Existing Numbers
4.14 Heavy Vehicles – Required & Existing Numbers
4.15 Heavy Vehicles – Optimum to Existing Clearance

5.1 Materials Recovered From Households ( Tonnes / 3-4 Months )
5.2 Monetary Value of Recoverable Waste – Household Earnings in Lakhs / 3-4 Months

6.1 Surface Water Quality – Perungudi
6.2 Climatic Data Analysis – Meenambakkam Station
6.3 Disposal of Solid Waste – Kodungaiyur
6.4 Chemical Composition of Waste – Kodungaiyur
6.5 Decomposed Waste Quality to Compost Quality
6.6 Landfill – Site Suitability
6.7 Landfill Gas Emission – Kodungaiyur
6.8 Common Green House Gases
6.9 Material Decomposition and End Products
6.10 Surface Water Quality – Kodungaiyur Canal & Buckingham Canal
6.11 Percolation Rates of Different Types of Soil
6.12 Ground Water Quality
6.13 Probability Index – Risk of Vector Borne Diseases
6.14 Income Availability Per Person
6.15 Crowding – Spatial Density
6.16 Crowding – Social Density
6.17 Crowding – Social Behaviour
6.18 Perception Index – Internal Environment
6.19 Perception Index – External Environment
6.20 Adaptability Index
6.21 Behaviour Index
6.22 Overall Impact – Kodungaiyur
