I bow before the Creator, Most Gracious and Most Merciful, Almighty Allah who always showered me with patience and perseverance that paved the path to keep going through thick and thin for the completion of this work...

The writing of this thesis has been one of the most significant academic challenges I have ever had to face. Without the support, patience and guidance of the following people, this study would not have been possible. It is to them I owe my deepest gratitude.

I extend my sincere thanks to my supervisor Prof. Mashiat U Siddiqui, he had always been accessible and willing to help me throughout my PhD period. As a result, research life became smooth and rewarding for me.

I would like to record my gratitude to my co-supervisor Dr. Asad U Khan for his guidance, supervision and advice from the very early stage of this research. He owns unbeatable energy and enthusiasm in research, which motivate all his colleagues and students. His broad knowledge, critical thinking and hard working are of most value for me. I am indebted to him more than he knows.

I don't have enough words to thank my youngest sister Amna for all the times when she had to take up my share of responsibilities without any complaints, for the constructive debates on various topics including my favourite 'science Vs commerce'. I can't miss thanking my brothers Nabeel, Adnan and Omar for always being understanding (you all are my most treasured gems).
