In the name of Allah, Most Gracious, Most Merciful.

First of all I would like to thank Allah, the Most Benevolent and Adorable. He guided all the channels to work in coordination to make this study possible. It is Allah, who gave me strength and spiritual power to face all the difficulties and barriers so calmly. Pursuing Ph D was a voyage with lots of crests and troughs. Overall it has been a unique learning experience, where many people have influenced and inspired me in various ways. The support and inspiration of lots of people who remained associated with me directly or indirectly all through the tenure of my thesis work, has made the completion of this arduous task possible. Here are few words for those special people.

I wish to express my deep sense of gratitude to my supervisor, Prof. Asif Ali not only for his excellent guidance, invaluable advice and keen interest in my research work but also for his moral encouragement and support which he provided me from time to time during the course of this work. His great knowledge and experience in research field acted as a torch to my research work. The research under his supervision was extremely productive and rewarding. Many thanks also to his personal advice whenever I was in dilemma.

I am extremely thankful to Prof. Najmul Islam, Chairman, Department of Biochemistry, J.N.M.C. for providing all the necessary facilities in carrying out this work. His cooperation for laboratory development for its smooth running is highly appreciable. His sound knowledge in the field of biochemistry benefited me a lot.

I am extremely thankful to Dr. Moinuddin for his constant help and guidance throughout my research work. His invaluable advice and scientific discussions helped me to step forward gradually to the completion of this thesis. His continuous counselling and valuable suggestions were always there whenever I found myself in distress. His broad knowledge and novel ideas proved extremely helpful in carrying out
this study. I would also like to thank Prof. Khursheed Alam and other faculty members of the department for their constant support, encouragement and motivation during the research work.

I am highly thankful to Dr. Rizwan Hasan Khan for his invaluable and timely suggestions. He developed interest for doing this uphill task. Much would have been left unapproachable without him.

I would also like to thank Prof. Riaz Mehmood for his enthusiasm, valuable suggestions and positive attitude which always motivated me towards right direction. His novel ideas and sound advice have been a source of inspiration to me.

I am highly thankful to Prof. Abida Malik who gave me permission to collect samples of rheumatoid arthritis patients from Microbiology department, J.N.M.C. The help extended by Prof. Harris Khan is also highly acknowledged.

My heartfelt thanks to Dr. Kiran Dixit who always guided me with her immense scientific knowledge. She always treated me like a younger sister and scolded me whenever I was wrong. She is flooded with working experience and knows how to deal with juniors and her superiors as well. I have a deep sense of appreciation for her strive for excellence in the field of research. Her all time support, friendly attitude, illuminating scientific guidance and encouragement acted as a driving force behind the completion of this study.

I sincerely acknowledge the help and cooperation which I received from my senior Dr. Saheem Ahmad. He always helped me with his indispensable advice and suggestions at every stage of this study. He made me acquainted with the handling of instruments, and fine practical knowledge. Working under his guidance was a revealing experience.

I am thankful to all of my lab colleagues for providing a stimulating and working environment for the research work. I wish to thank Dr. Zarina Arif for being extremely friendly, helpful and cooperative throughout. Thanks are also due to my seniors Mr. Ashraf,
Dr. Asad, Dr. Nadeem, Dr. Humera, Dr. Imteyaz, Dr. Imran and Dr. Shahid for their help and cooperation. I am grateful to my dear friend Farzana for being with me always whenever I needed her. She has helped me in every walk of life throughout my Ph D tenure. Things would not have been so fine for me had she not been there. I am also thankful to my friends Binish, Uzma and Dr. Sana for their friendly and helpful suggestions. Endless discussions with them sometimes resulted in fruitful ideas and made this strenuous work smooth and interesting. I wish to express my appreciation to Badar Bhai and my juniors Parvez, Yasir and Rauf who have always supported me.

I wish to extend my sincere thanks to Mujahid bhai, Sabu bhai, Nasir bhai, Gautam bhai, Faisal bhai, Huma apa and all other non-teaching and technical staff of the department of Biochemistry for their kindness and dedication. The essential facilities and invaluable support provided by the whole staff were appreciable.

I am thankful to Mr. Pankaj and Mr. Sanjay for helping me in collecting samples of rheumatoid arthritis patients from Microbiology department, J.N.M.C.

I can’t skip mentioning my friends Shafquat, Nida and Anubha for their contributions at various stages of this research and for helping me get through the difficult phases of my life.

I would also like to thank Ejaz bhai and Rabbani bhai for the help and support during my research work. Their valuable suggestions and scientific approach helped me in bringing this thesis in its present form.

No words can truly express my deepest gratitude and appreciation for the help and moral support given by each and every member of my family especially my parents. My parents have always put education as a first priority in my life and raised me to set high goals of life. They taught me to value honesty, courage, hard work and humility above all other virtues. I am fortunate in having such parents who have been a source of inspiration and their unconditional love overwhelms me. I dedicate this work to them, to honour their love, patience and support
during these years. They deserve far more credit than I can ever give them. Thanks are also due to my sisters Aiman, Bushra, Noma and brother Ali who most willingly extended a helping hand and always there for me during my most depressing days and difficult situations. Words are not enough to express my gratitude to my late grandmother and aunt Shazia Khala who were always there to encourage me and showered their love, kindness and support beyond limits. May their soul rest in peace.

I wish to express my sincere gratitude to my in-laws especially my mother-in-law and father-in-law for their moral and emotional support without which this work would have been impossible. I am falling short of words in expressing my indebtedness to my husband, Syed Mohammad Tabrez who stood by me always in every difficult situation and helped me get through it. His constant moral support and encouragement helped me a lot in the accomplishment of this study. His presence often seemed to be a shady tree for me. He deserves special mention for his kind behaviour, worthwhile suggestions and support whenever needed.

Last but not the least, my sincere thanks to Mr. Goldy, Rafiq Complex, A.M.U., Aligarh for having completed this work in a short span of time with fair degree of competence and professionalism.

“Striving for success without hard work is like trying to harvest where you haven’t planted.”

(Saman Ahmad)
