ACKNOWLEDGEMENT

First and foremost, I praise and thank Lord Almighty for his blessings tenderly bestowed upon me.

More than any others, blessings of two individuals have shaped my life in research, Dr. Sr. P.D. Mercy and Dr. Sr. M.R. Basil Rose. When I was in the state of hopelessness, it was Sr. Mercy who gave me hope. Her true care towards me gave a good break in my research life because it was Sr. Mercy who gave me the cuttings to apply for JNMF. Even I myself never took effort to apply for any scholarships, though I was in the darker part of my life without money for research. It was her blessings and care that won me JNMF and now I perceive her in Sr. Basil. I feel extremely privileged and grateful for their tutelage, guidance, encouragement and tremendous endurance, without which nothing would have been possible. They had confidence in me when I doubted myself. Only this confidence had made me to complete this thesis. I have no words to thank them; indeed I will be always thankful to them.

My special thanks to all the sisters of Holy Cross, for their prayerful support.

I would like to thank the principal, Dr. Sr. Rosalie and former principal, Dr. Sr. Elsy George, Vice principal, Dr. Sr. Sophy, Secretary, Dr. Sr. Gerardin Jayam for their kind support in Holy Cross College.

I thank Dr. Sr. Mesmin, who amidst her busy schedule as the mother of the Crossian family, whole heartedly spared her precious time in correcting my thesis. Thank you very much sister.

I acknowledge Sr. Jhancy and other staffs of Holy Cross Library for providing me a friendly and gratification environment in the library.
With gratitude I thank Dr. S. Mahalingom, B.V.Sc., Veterinary Assistant Surgeon, who helped in the collection of blood samples.

I acknowledge Ruby madam, Dr. John Bernet for their valuable helps rendered to me in my research.

I am greatly indebted to my teachers, Ms. I. Dulsy Fatima, Leela Judnis, Vimala Lesly Josephin, V. Lucy Zephrin, S. Jayasuriya, K. Thanalakshmi, J. Alice Prema, Y. Mary Saroja, Y. Premalatha, S. Mary Mettilda Bai and S. Shylla Suganthi for their endorsement and prayers.

I also thank non-teaching staffs, Mr. P. Jesuraj, Ms. S. Mary Alphonsal, C. Jegathammal, A. Leema Rose, K. Mary Rita Lumina, Mr. F. Melgias, S. Thankaraj and Suresh for their kind cooperation and adjustments with me throughout the research. My thanks to all the garden workers of Holy Cross College campus for their support in animal collections and informative tips about the animals.

I gratefully acknowledge Thana miss and Jayalakshmi akka from whom I learnt how to be patient and how to overcome the difficulties in various stages of research.

I sincerely thank Vino miss and Priya akka. I could never forget the memorable events of funny, notty, joyful, lovely and enjoyable happy moments with them that made the stressful times more bearable.

Through the wonders of the internet and e-mail, I was able to correspond with numerous individuals from around the world who graciously provided me with their valuable publications.

I thank my parents who molded me to adjust in different situations and, for patiently bearing me. I would like to thank my dear mother (Mrs. R. Mangaleswari), who was the only consoler of mine. Her care towards me and my crabs made this research a successful one. Next
I would like to thank my father (Mr. N. Ramaswamy), who accompanied me everywhere at any time wholeheartedly to carry out my work fruitfully.

I am indebted to my two lovely and lovable sisters, Geetha and Anandhi. Their criticism, encouragement, ideas, prayers and timely helps enthralled me. We three enjoyed typing and aligning the whole thesis on our own. But really, the difficult part in typing i.e. reference was typed by my sister Geetha, indeed without the help of any one of us. For this I should really thank her. I also thank my younger sister Anandhi for her stimulatory words to complete and submit my thesis at the earliest.

I also take this opportunity to express my gratitude to my uncle, Mr. N. Retnaswamy and his family for their kindness, blessings and support.

I am also thankful to my uncle Mr. T. Mohan and his family for their lovely care, encouragement, guidance and hospitality during our journey to New Delhi (JNMF).

I genuinely thank Jawaharlal Nehru Memorial Fund (New Delhi) for awarding me with the scholarship to carry out my research work in the “School of Lectins”.

Last but not least, I would like to thank my dear pets Dopii, Browny, Osama and my pretty crabs for their sacrifice and contributions to my research.

I am indebted to all those whom I have mentioned in this thesis and also to many others unmentioned, who helped me in various aspects of my life.

R. Viswambhari Devi
