ACKNOWLEDGEMENT

At the outset I would like to express my deep appreciation to my guide Prof. S.S. Lele for her imperative support and inputs during the course of my doctoral work. Working in her guidance is undoubtedly the most fruitful learning period of my life that went far beyond my expectations. I sincerely thank her for giving me the opportunity to realize my wishes and dreams. I am thankful to Prof. G.D. Yadav, Institute of Chemical Technology, for providing necessary facilities for carrying out this research work. I am proud to have done my research under his headship. I appreciate all the teaching staff of the Food Engineering and Technology Dept. It is their consistent effort that crafts this department one of the best. I am grateful to UGC for providing fellowship during my research. Of the extremely supportive people a special acknowledgement to Melvin, Rishikesh and Santosh who smilingly and unhesitatingly helped me on every required occasion. A Special acknowledge of Dr. Kaushiki Kadam, National Institute of Research in Reproductive Health who selflessly helped me with the molecular biology part of my Ph.D work. A special thanks to Narinder and Swati for consistent support thro my Ph.D. I appreciate them for the help and support rendered. I thank Dr. Suhas and Dr. Shailesh for their scientific discussions and the wonderful company provided. I would wish to thank all my departmental friends and colleagues, the company and friendship provided by them thro my Ph.D was a great experience. I would not mention names for fear of leaving someone out. My priceless friends Pooja, Amar, Mayur, Jitesh, Param, Dias, Ajesh and Rajesh need a special mention for their invaluable company. Finally to my family for their unquestioned support till date. It was only their love and moral support without which this work would not have been possible. I dedicate this work to them.

Anupam Bhagat
