LIST OF TABLES

Chapter 2

Table 2.1 : Loss in crop yield caused by insect pests and fungal pathogens
Table 2.2 : List of common synthetic pesticides
Table 2.3 : Major phytopathogens and the diseases caused

Chapter 3

Table 3.1 : Reagents used for the spot test

Chapter 4

Table 4.1 : Scale to present antifungal potentiality of extracts
Table 4.2 : Antifungal activity of solvent extracts of P. reticulata against pathogenic fungi
Table 4.3 : Antifungal activity of solvent extracts of R. roesleri against pathogenic fungi
Table 4.4 : Antifungal activity of solvent extracts of U. longissima against pathogenic fungi
Table 4.5 : Antifungal activity of solvent extracts of S. himalayense against pathogenic fungi
Table 4.6 : Effect of hexane, ethyl acetate and methanol extract of P. reticulata on germination, shoot length and root length of P. minor
Table 4.7 : Effect of solvent extracts of R. roesleri on germination, shoot length and root length of Phalaris minor seeds
Table 4.8 : Analysis of variance of % seed germination of wheat seeds
Table 4.9 : Analysis of variance of shoot length of wheat seeds
Table 4.10 : Allelopathic potential of solvent extracts of P. reticulata on wheat seeds
Table 4.11 : Effect of solvent extracts of R. roesleri on wheat germination, shoot length and root length
Table 4.12 : Analysis of variance for root length of wheat seeds
Table 4.13 : Allelopathic potential of solvent extracts of *P. reticulata* on lentil seeds

Table 4.14 : Analysis of variance of % seed germination of lentil seeds

Table 4.15 : Analysis of variance of shoot length of lentil seeds

Table 4.16 : Analysis of variance of root length of lentil seeds

Table 4.17 : Effect of solvent extracts of *R. roesleri* on germination, shoot length and root length of chick pea seeds

Table 4.18 : Analysis of variance of % seed germination of chick pea seeds

Table 4.19 : Analysis of variance of shoot length of chickpea seeds

Table 4.20 : Analysis of variance of root length of chick pea seeds

Table 4.21 : Antibacterial activity of solvent extracts of *P. reticulata*

Table 4.22 : Antibacterial activity of solvent extracts of *R. roesleri*

Table 4.23 : (a) Isolated compounds from test lichen species

(b) Different class of compounds obtained from the test lichen species

Table 4.24 : Antifungal activities of chemical constituents isolated from solvent extracts of *P. reticulata* and *R. roesleri* against pathogenic fungi

Table 4.25 : Effect of secondary metabolites isolated from *R. roesleri* on germination, shoot length and root length of *P. minor*

Table 4.26 : Antibacterial activity of isolated chemical constituents

Table 4.27 : Algaecidal activity of isolated chemical constituents
