## Chapter I  Introduction  1

1.0 Introduction  1
1.1 English language teaching in Thailand  2
1.2 Language curriculum for technical education in Thailand  5
  1.2.1 Three-year certificate in vocational education  5
  1.2.2 Two-year diploma in vocational education  6
1.3 Language curriculum for Information Technology Programme  8
  1.3.1 Two general language courses  8
  1.3.2 Two vocational-based language courses  9
1.4 Background of the study  11
  1.4.1 Factors affecting students’ communicative competence  12
  1.4.2 Rationale for Content-Based Instruction  18
  1.4.3 Research on Content-Based Instruction  19
  1.4.4 CBI in Thailand  20
  1.4.5 Language materials currently used in technical education  22
1.5 Significance of the study  25
1.6 Objectives of the study  27
1.7 Delimitations of the study  27
1.8 Organization of the report  28
Chapter II  Review of Related Literature

2.0  Introduction

2.1  Content-Based Instruction
    2.1.1  Definition of CBI
    2.1.2  Prototype of CBI
        A) Sheltered model
        B) Adjunct model
        C) Theme-based model

2.2  Materials construction
    2.2.1  Characteristics of CBI materials
    2.2.2  Framework of context an syllabus
    2.2.3  Process of materials design
    2.2.4  Grading tasks
    2.2.5  Sequencing tasks

2.3  Materials evaluation
    2.3.1  Predictive evaluation
    2.3.2  Retrospective evaluation

2.4  Additional considerations for materials construction
    2.4.1  Two related approaches for materials construction
    2.4.2  Framework for materials construction

2.5  Additional considerations for materials evaluation
    2.5.1  Taxonomy of thinking skills
    2.5.2  Learning and production
    2.5.3  Framework for materials evaluation

2.6  Summary
Chapter III  Research Design

3.0   Introduction  92
3.1   Objectives of the study  92
3.2   Sample  92
3.3   Research design  93
  3.3.1   Process for materials construction  93
  3.3.2   Methodology to materials evaluation  95
3.4   Research instruments  106
  3.4.1   Instruments for materials construction  106
  3.4.2   Instruments for materials evaluation  110
3.5   The pilot study  114
  3.5.1   Results of Task 1: Network topology  114
  3.5.2   Results of Task 2: Surfing the Net  119
3.6   Summary  124

Chapter IV  Materials Construction

4.0   Introduction  125
4.1   Data sources for materials construction  125
  4.1.1   Course syllabus of English for IT  125
  4.1.2   Students’ needs and interests  127
  4.1.3   Students’ language proficiency  135
  4.1.4   Results of IT specialist’s consultation  140
4.2   Decision and design for materials construction  142
  4.2.1   Design for constructed materials  142
  4.2.2   Summary of constructed materials  144
4.3   Analysis of the components of the constructed tasks  150
4.4   Summary  151
Chapter V  Materials Evaluation  153

5.0  Introduction  153
5.1  Results of predictive evaluation  153
   5.1.1  Effectiveness of constructed materials  154
   5.1.2  Conclusion  161
5.2  Results of retrospective evaluation  162
   5.2.1  Results of Task 1: Network topology  164
   5.2.2  Results of Task 2: Surfing the Net  178
   5.2.3  Conclusion  186

Chapter VI  Summary and Conclusions  189

6.0  Introduction  189
6.1  Summary of the present study  189
   6.1.1  Significance of the study  189
   6.1.2  The objective of the study  190
   6.1.3  Methodology  190
   6.1.4  Results of the study  192
6.2  Discussion of the results of the study  193
6.3  Practical implications for CBI materials development  196
6.4  Suggestions for further research  197
6.5  Personal reflections  198

Bibliography  200
