Acknowledgments

Achieving a milestone for any person atones is extremely difficult. However there are leaders, motivators which come across like curvaceous path, like twinkling stars in the sky and make our way with the aim much easier. It becomes my humble and foremost duty to acknowledge all of them. Writing an acknowledgement is an apt convention which enables the verbal flow to acquire an almost frivolous fragrance and simultaneous provide an opportunity to convey the true emotion which might not otherwise be possible in everyday life. First of all I would like to owe my gratefulness to almighty GOD whose blessings have brought me so far.

"My heart is bursting with gratitude and praise because: I realize
Every beautiful thing in my life is a gift from God"

The human capacity of expression one’s feeling of respect and gratitude are so limited that word simply don’t do any justice to my humble feeling of reverence and gratitude to my esteemed guile and motivator Dr. Sanjeev Kumar Singh (Associate Professor. Deptt. Of Biochemistry, G, R, Medical College). He has been a constant source of great inspiration throughout the study. His Invariable, untiring memorable guidance, constant encouragement, continues supervision, continues supervision and suggestion enabled me to bring this work to a stage of completeness and preventability despite my respected fallacies and shortcomings. Words are inadequate to express my feeling or warmest appreciation and regards to such as intellectual, elite, noble and enlightened teacher, completely dedicated to his profession. it is only because of his in depth knowledge and meticulous methodology that I have been able to successfully complete this word, he took personal care and pains to guide me along a proper path which is worth remembering and pleasured to me for all the time.

I am grateful to Dr. S. N. Iyengar, Dean, G.R. Medical College, Gwalior, for giving me permission to undertake this work in Biochemistry Department, G.R. Medical College, Gwalior.

My head bows down with respect and reverence when I think of Dr. (Mrs.) Neelima sing Chandel, Professor and Head, Department of Biochemistry, G.R. Medical College, Gwalior. I am more than fortunate to get the invaluable opportunity of working under proficient and ablest guidance. Needless to say she has showered me with every instrument which is considered vital in convening a venture into a success.

My deepest gratitude goes to Prof. S. Ganesh, Head, BSBE, IIT, Kanpur, who was not only my teacher but also as my overall mentor during my stay at IIT, Kanpur. It would be impossible to embellish the influence of Prof. Ganesh to this thesis and as well as, substantial portion of my stay at IIT campus. He has always make himself available to clarify my doubts despite his busy schedule or his support, by providing me permission to process blood samples in his lab. I am thankful to him for the constructive and constant inspiration during this work.

I express my deep gratitude to Dr. D. S. Chandel, DSW, Jiwaji (University, gwalior and Registrar, Raja Man Singh, Music University, Gwalior for his help during the period of this research work.

There are no words to express my deep sense to gratitude and respect to Dr Akshay Kymar Nigam, Professor & Head, Department of Radiation Oncology, J. A.
Group of Hospitals, GRMC, Gwalior, For his valuable suggestions, support, patience and motivation, I pay my heartily gratitude to respected sir or his support, by providing me permission to collect sample from his department. I am thankful to him for the constructive and constant inspiration during this work.

I express my profound great fullness to Dr. (Mrs.) Nivedita Singh (Associate professor. Deptt. of Biochemistry), G.R. Medical College. She is an eminent and renowned teacher who, with his wide range of intellectual spectra and extreme softness of heart with ever smiling face and helping hand always guided and encouraged me. I am extremely thankful to her valuable suggestions, incredible support, co-operation, amazing response and guidance throughout this study. This research work would not have seen light of day without the perpetual support or impetuous gracefully showered on me. I acknowledge his benevolence with splendid gratefulness.

My special thanks to Assistant professor Dr. Vishal Bhargava, Dr. Tarun Sharma and Demonstrator Dr. (Mrs.) Sarita Agrawal, Dr. kapil Shrivastava Gajara Raja Medical College, Gwalior, for their kind cooperation, help and precious advice given during the course of study.

I am thankful to my co-research scholar Dr. Krishan Gopal, Dr. Rashmi, Dr. Amrita, Dr. Mayank, Dr. Pranshi, K. K. Pandey, Vedika, Retika, Swati, Mukesh, Roshan, and Ashish, Deptt. of Biochemistry, Gajara Raja Medical College, Gwalior, who inspired my final effort despite the enormous work pressures we were facing together.

I am highly thankful to Mr. Kishan Batham, Mrs. Asha, Mrs. Preeti Rathore and Mr. Satendra Gajara Raja Medical College, Gwalior, for their cooperation during my thesis work.

I would like to acknowledge Mrs. Jasinta and Mrs. Shakuntala Gajara Raja Medical College, Gwalior, for their help and support in completion of this work.

I owe my deepest gratitude to my grateful parent’s Shri Uttar Singh and Smt. Rama Devi who have always supported, encouraged and believed in me, in all my endeavors for forever.

Finally, to my loving brother Er. Green Maraiya for their encouragement and profound understanding.

In the end I would like to thank everybody who has knowingly or unknowingly helped me in the successful compilation of this work.

Dinesh Maraiya
