ACKNOWLEDGEMENT

The author sincerely thanks Professor K. Venkataraman Director, National Chemical Laboratory for permitting him to work and submit the results in the form of a thesis.

A special debt of gratitude is felt to the author's guide, Dr. N. Krishnaswamy whose guidance, encouragement, and willingness to listen have been the major factors in the author's success in completing this work.

The author would also like to express the satisfaction gained from his discussions with his colleagues in the Polymer Chemistry Division and he is deeply indebted to them for their generous help during the various phases of this work.

March 1966.
