ACKNOWLEDGEMENT

The present study is the outcome of the cooperation and help extended to me by my research guide, my Senior Colleagues, and a host of other individuals. I would like to put on record my deep sense of gratitude to the following individuals and institutions.

With a profound sense of gratitude and indebtedness, I express my humble thanks to my research guide and supervisor Dr. N.K. Patil for his valuable guidance. Painstakingly at every stage he helped me in a number of ways. From time to time he made valuable suggestions, gave proper directions to my research work, discussed the problems with me and untiringly went through the drafts of my work and suggested improvements in them. It was really a treat to watch him supervising over my work in a methodical and systematic manner. He had been a source of inspiration throughout my research work.
