APPENDEX
Papers Presented In The Seminars / Conferences And Published In Recognized Journals

STATEMENT - I

The present work is based upon the taxonomical studies of fungi from Western Ghats of Maharashtra. Total number of 145 taxa of different groups of fungi have been described which are either new to Science, new to India, new to Maharashtra State or recorded to new hosts. Many genera viz. Anisomyces, Ophiocordyceps, Dimerina, Dimerium, Phaeodimeriella, Phragmeriella, Phaeophragmeriella, Endoptychum, Galeropsis, Sibirina, Zygoophiala and Satchmopsis have been recorded for the first time in India. Some entomogenous genera like Aspergillus spp. have been cultured. Most up-to-date literature has been referred for the perfect identification. Some new combinations have been proposed and some erroneous taxa were taxonomically corrected.

Therefore, the work represents an original contribution to the taxonomy of fungi. This work has not been previously submitted for the award of any degree of any University.
STATEMENT – II

This is an original piece of research work and reports new investigation. The sources from which information is gathered have been listed in the bibliography. The findings and conclusions are based on up-to-date and exhaustive literature survey carried out by referring different journals, review articles, books, monographs, reports etc.
