ACKNOWLEDGEMENT

The success of any project depends largely on the encouragement and guidelines of many others. At the beginning of my thesis, I take this opportunity to express my gratitude to the people who have been instrumental in many ways to the success of this study and made it an unforgettable experience for me.

I would like to express my sincere gratitude to my guide Dr. S. R. Chaudhari, Professor and Head, Department of Mathematics, School of Mathematical Sciences, North Maharashtra University, Jalgaon for his able guidance and continuous support during my research work. I will be ever grateful to him for his motivation, enthusiasm and kind patience. His guidance helped me in all the time of research and writing of this thesis. I take this opportunity to also remember all my teachers (school, college and university) with thanks, who inspired me and molded me, into whatever I am now. Besides my guide, I would also like to express my thanks to Prof. L. N. Katkar, Former Head, Department of Mathematics, Shivaji University, Kolhapur for his insightful and perceptive comments as well as immense help and interest in the subject. I am grateful to Prof. S. H. Thakar, Head, Department of Mathematics, Shivaji University, Kolhapur, for providing me the departmental facilities. I also express my sincere thanks to all the teaching and non-teaching staff members of the Department, for their kind co-operation and support during my work and for promoting a stimulating and welcoming academic and social environment. It is not possible for me to miss out acknowledging Dr. M. A. Khan, my mentor, presently Registrar, University of Mumbai. At the very difficult time, during initial days on Faculty Improvement Programme (FIP), his one sentence gave me courage to stay away from my family and concentrate on my work. I will never forget the kindness, help and homely atmosphere of Mrs. Leena S. Chaudhari, who deserves very special thanks. I am also thankful to my colleagues and friends Dr. S. A. Morye, Dr. S. S. Desai, Dr.
D. D. Komejwar, Dr. M. T. Gophane, Dr. K. D. Kucche and Shri. A. P. Patil for their timely help and encouragement. I am thankful to the teaching and non teaching staff members of School of Mathematical Sciences, North Maharashtra University, Jalgaon. I offer special thanks to Shri. R. D. Koshti, Assistant professor, Department of Statistics, School of Mathematical Sciences, NMU, Jalgaon, for his kind help from time to time.

I am very much grateful to the UGC, New Delhi, India for awarding me the Teacher Fellowship under the FIP for two years. My sincere thanks are also due to the Government of Maharashtra for relieving me from my regular duties for the period of two years of FIP. I wish to give due credit to the Indian railways too, because of whom I could attend as many as 11 conferences, always reaching in time. There were many occasions when I was able to study during my journeys in the train or even on the platforms and found many important results or necessary proofs which are part of my thesis.

I would like to thank my brother and sisters for their continuous encouragement and moral support. Most importantly, I wish to thank my parents Shri. Sabaji N. Naikdhure and Sou. Snehalata S. Naikdhure for inspiring me throughout my life and career. I am thankful to my mother in law and sisters in law for their constant support, especially to Shivani, for the time spent with my daughter in my absence and for having taken very good care of her. I am grateful to my wife Asha, for taking on the full burden of running our home with her job on one side and completion of her own Ph.D. on the other side. I am ever thankful to everyone even those knowingly or unknowingly missed out from the above list, who have directly or indirectly contributed to my research work.

Last but not the least; I thank my 10 years old daughter, Maithili, for the sacrifice of the joys of childhood that she has made for two years when I was away from her.

Mr. Shrinivas Sabaji Dhure
