Acknowledgement

It is a pleasure to express my gratitude to various persons who have helped and inspired me during the doctoral study. It is their collective efforts that have enabled me to compile this thesis.

Foremost, I would like to express my sincere gratitude to Dr Shashi Bhushan Tripathi, my supervisor for his guidance, suggestions, motivation and continuous encouragement during the course of this work at TERI University. I am indeed indebted to him for helping me evolve as a new person.

I wish to express my warm and sincere thanks to Dr R K Pachauri, Director General, TERI; Dr Leena Srivastava, Acting Director General, TERI and Vice Chancellor, TERI University and Dr P M Reddy, Head of the department, Bioresources and Biotechnology for providing me with the infrastructure support. I also wish to thank Dr Gp. Cpt. Rajiv Seth, Registrar and dean, TERI University for his cooperation and providing me all the facilities and necessary help during the study.

It is a pleasure to express my gratitude wholeheartedly to Dr Alok Adholeya, Director of Bioresources and Biotechnology, TERI for their assistance for carrying capsaicinoids profiling.

I sincerely express my gratitude to Student Research Committee (SRC) members Dr Nidhi P Chanana, Dr Anandita Singh, Dr Neetika W Chhabra and Mr M V Shiju, for the periodic assessment of my work and their valuable suggestions. I am grateful to Dr Rupesh Deshmukh for providing critical insights and making me learns not only the execution of the experimental work but also aspects of writing it scientifically. I would also thankful to Dr Neeraj Dwivedi for providing capsicum accessions to carried out my research experiment.

I would specially like to thank Mr Madan Singh Negi, Mr Shyam Sundar Sharma, Ms Pratima Sinha and Ms Priya Vijayan for being kind and patient while training me in the molecular biology techniques.
It gives me immense pleasure in acknowledging the help given by Mr Shivaraj S M, Ms Priyanka Dhakate, Ms Shikha Tyagi, Ms Tanya Chhabra, Mr Vivek Kumar Singh, Ms Priyanka Nanda, Mr Anoop A Malik during research experiment. I deeply appreciate the cheerful assistance offered by Mr Kamlesh Kumar and Kishan ji for conducting the field data collection.

Sincere thanks are extended to my batch mates, friends and juniors Sabari P, Binod Kumar Mahto, Suneel Kumar, Madhvi Mishra, Shubh Sankar Paul, Ashwani K Singh, Devi V, Swati Patel, Soumya Dhup and Anju Singh.

I would also like to thank Ms Deep Rajni, Ms Leena Johny, Ms Shivani Shrivastava, Mr Chandrakant Tripathi and Mr Hetram Ji for their kind support for conducting High Performance Liquid Chromatography (HPLC).

I am thankful to Mr Birender Bharti, Mr Narayan Chand, Mr Rajkumar Bharti, and Mr Nandan Singh and for the cheerful and congenial work atmosphere. I would also thankful to Mr Kamal Sharma, Mr Prem Suresh, Mr C.T. Sebastian and Mr Sunil for administrative help from TERI University. Thanks are also due to the IT help desk, electricians, photocopying and dispatch departments.

Special thanks to my family for unrelenting support for completing my PhD thesis. I dedicate this work to my father Md Soban Ali and my mother Ms Nuraza Khatun who have always been there for me and supported me in each and every endeavor. I would like to give special thanks to my brother Md Zahirul Islam, Md Amzad Ali, for their love, affection and moral support. Special thanks are due to Bindiya Singha for her encouragement and support. They all have always been patient with me and shared all my frustrations and accomplishments of this work. I shall always be grateful to my family for their love, care and trust.

Md Aminul Islam
