List of Figures

Figure 3.1 The best-fit detection function model for the Red Junglefowl for pooled data (all seasons) in Katerniaghat Wildlife Sanctuary
Figure 3.2 The best-fit detection function model for the Red Junglefowl during the summer season in Katerniaghat Wildlife Sanctuary India
Figure 3.3 The best-fit detection function model for the Red Junglefowl during the pre-monsoon season in Katerniaghat Wildlife Sanctuary India
Figure 3.4 The best-fit detection function model for the Red Junglefowl during the post-monsoon season in Katerniaghat Wildlife Sanctuary India
Figure 3.5 The best-fit detection function model for the Red Junglefowl during the winter season in Katerniaghat Wildlife Sanctuary India
Figure 3.6 Sex-ratio (males: 100 females) of Red Junglefowl in Katerniaghat Wildlife Sanctuary
Figure 4.1 Areas of different habitat types available to Red Junglefowl in Katerniaghat Wildlife Sanctuary
Figure 5.1 PCA scree plot for all sixteen components of nesting habitat of Red Junglefowl in Katerniaghat Wildlife Sanctuary
Figure 5.2 Biplot of Principal Components Analysis (PCA) on nesting habitat variables of Red Junglefowl in Katerniaghat Wildlife Sanctuary
Figure 5.3 MAXENT modelling prediction for potential nesting habitat of Red Junglefowl in Katerniaghat Wildlife Sanctuary
Figure 5.4 BIOCLIM modelling prediction for potential nesting habitat of Red Junglefowl in Katerniaghat Wildlife Sanctuary
Figure 5.5 GARP modelling prediction for potential nesting habitat of Red Junglefowl in Katerniaghat Wildlife Sanctuary
Figure 5.6 Total Area Under Curve (AUC=0.76) for MAXENT modelling prediction
Figure 5.7 Total Area Under Curve (AUC=0.97) for BIOCLIM modelling prediction
Figure 5.8 Total Area Under Curve (AUC=0.95) for GARP modelling prediction
Figure 6.1 Total Area Under Curve (AUC=0.69) for MAXENT modelling prediction
Figure 6.2 Total Area Under Curve (AUC=0.61) for BIOCLIM modelling prediction
Figure 6.3 Total Area Under Curve (AUC=0.78) for GARP modelling prediction
Figure 6.4 MAXENT modelling prediction for potential habitat of Red Junglefowl in Katerniaghat Wildlife Sanctuary
Figure 6.5 BIOCLIM modelling prediction for potential habitat of Red Junglefowl in Katerniaghat Wildlife Sanctuary
Figure 6.6 GARP modelling prediction for potential habitat of Red Junglefowl in Katerniaghat Wildlife Sanctuary
Figure 6.7 Land use and Land Cover (LULC) map of Katerniaghat Wildlife Sanctuary
Figure 6.8 Normalized Difference Vegetation Index (NDVI) map of Katerniaghat Wildlife Sanctuary
Figure 7.1 Density/sq km of Red Junglefowl in disturbed and undisturbed habitats of Katerniaghat Wildlife Sanctuary

Figure 7.2 Mean group size/sq km of Red Junglefowl in disturbed and undisturbed habitats of Katerniaghat Wildlife Sanctuary

Figure 7.3 Encounter rate/km of Red Junglefowl in disturbed and undisturbed habitats of Katerniaghat Wildlife Sanctuary

Figure 7.4 Sex-ratio (males: 100 females) of Red Junglefowl in disturbed and undisturbed habitats of Katerniaghat Wildlife Sanctuary

Figure 7.5 Effective strip width (m) of Red Junglefowl in disturbed and undisturbed habitats of Katerniaghat Wildlife Sanctuary

Figure 7.6 The best-fit detection function model for the Red Junglefowl in disturbed habitat of Katerniaghat Wildlife Sanctuary

Figure 7.7 The best-fit detection function model for the Red Junglefowl in undisturbed habitat of Katerniaghat Wildlife Sanctuary

Figure 7.8 Biplot of Principal Components Analysis (PCA) for undisturbed habitat variables of Red Junglefowl in Katerniaghat Wildlife Sanctuary

Figure 7.9 PCA scree plot for all fifteen components for undisturbed habitat variables of Red Junglefowl in Katerniaghat Wildlife Sanctuary
