Acknowledgement

In the process of completing this project, it became quite clear to me that a research work of such magnitude cannot be completed alone. It is by God’s grace and the concerted efforts of many people that this piece of work has been successfully completed. Although the list of individuals I wish to thank extends beyond the limits of this format, I would like to thank the following persons for their dedication, prayers, and support during this work.

It is difficult to express my gratitude to my Ph.D. supervisor, Prof. B. C. Tripathy whose enthusiasm, inspiration, amicable guidance and painstaking efforts to explain things clearly and simply has been vital throughout the tenure of my PhD studies. He provided encouragement, sound advice, good teaching, good company and countless significant ideas. Without him, this work would have been a cul-de-sac for me. It was he who introduced me into the world of research as I now know it and allowed me enough freedom to pursue it as I wanted. He has taught me enough to get me through any challenges in the future. This piece of work would have been a distant dream for me without him.

I would like to express heartfelt regards to Madam Tripathy for her motherly affection, the home-cooked food and the countless cups of tea that were so lovingly prepared on numerous occasions during the final phase of my thesis writing.

I am extremely thankful to the incumbent and the former faculty members of the School of Life Sciences for generating all necessary facilities and conducive environment for carrying out the present work and also for so patiently teaching us during our course work. I would sincerely acknowledge my thanks to the present Dean, Prof. R. Madubala and all the former deans Prof. K.C. Upadhyaya, Prof. Alok Bhattacharya, Prof. R. N. K. Bamezai, Prof. P. K. Yadava and Prof. R. K. Kale for providing a conducive atmosphere for research and making the School of Life Sciences an example of an extended family working in a coordinated fashion. The efforts of all the present and former deans and especially Prof. Rajendra Prasad, Dr. Natarajan, Dr. Atul Johri and Dr. Ashwini Pareek in the smooth running of the Central Instrument Facility (CIF) of SLS is highly appreciated. I also thank Prof. N.B. Sharin, Prof. Prof. P.C. Rath, Prof. Ashish Nandi, Prof. Supriyo Chakravarti, Prof. Rana Pratap and many other faculties for their effort to make school of life sciences as a model for other centers of research.

I would like to thank all the faculty members of CBSH, Pantnagar University, for all the knowledge imparted to me during my master programs. And especially I would like to thanks Prof.
D.P. Mishra, Prof. A.K. Gaur, Prof. A.K. Gupt, Prof. Rakesh Mall and Prof. Sandip Arora for teaching me the basics of biochemistry and molecular biology during my masters program.

I owe a debt of gratitude to Dr. B.S. Tiwari for so patiently helping me through when I was in trouble regarding any of my results. Thank you Sir, for all the time that you spared for me.

Our laboratory is not just a working place rather it is a small family with great camaraderie among its members. I would sincerely like to thank all its past as well as present members, Rupesh, Ajay, Gopal, Ardhendu, Ansuman, Siddhartha, Rajneesh, Satpal, Vijay, JP, Namrata, Kamal, Chitra, Deepika and Sampurna for their affection, care, support in lab management and sometimes tolerating my erratic behaviour and annoyance. At this juncture I especially thank Shiv and Vivek, who were always there for me whenever I needed their help. I cannot forget to thank Priyanka for helping me a lot during the last phase of my PhD work. I also want to thank all the trainees Sasmita, Sanyukta, Amrin, Rachana, Jai shree and Shubhasmita who were the part of my PhD work, and especially I would like to thank Seema for her help in my thesis writing. My special thanks are due to Sumer Singh for his constant help in official management. I would like to thank Nathu, Ganesh and Balseet for routine lab cleaning and washing.

My family has been a source of great strength and constant inspiration for me. My deepest gratitude goes to my family for their unflagging love and support throughout my life; this dissertation is simply impossible without them. I am indebted to my father, B.D. Joshi for his care and love. My kind regards goes to my brothers B.M Joshi, L.P Joshi, and M.C Joshi for their love, care, and motivation for me. I will never fulfill the debt of my beloved mother who taught me the first lesson of life and made me so strong to face any challenge with full of enthusiasm. I also want to thank my Sisters Vimla, Anju and Shakhu for their love and care they have shown throughout my life.

My friends, colleagues and juniors at the School of Life Sciences: Special thanks to all of you, and I really mean all of you as you have contributed to my thesis by being there at the coffee, the lunch or at the corridors. I will never forget you.

I would like to thank the staff and workers of Tapti hostel and especially Pandit jee for his care during my long stay in Tapti hostel.

I would like to thank my hostel friends Chandru, Prithvi, Manas, lucky, Amit, Ashu, Jasveer and Bajpai jee for their help and support throughout my stay in Tapti hostel. I want to
especially thank my roommate Bharat bhai who was available always whenever I called. Thank you Bharat bhai you are very good friend and a good roommate also. I would like to thank Sharada, and Papiya manna for their help in tracing spectroscopic data.

I would to thanks Fariedi sir for his help by sending me papers needed during my thesis writing.

My heartfelt gratitude towards the SLS staff, especially, Minu Ma'am. Without her help it would have been difficult to complete this work smoothly.

I want to show my gratitude towards Shramajee, TEM counsellor of AIF, JNU, for helping me lot during electron microscopy experiment.

This letter of acknowledgement will not be complete without mentioning the names of my friends and batch mates, Shivesh, Ravi, Shiteshu, Ratnakaran, Gautam, vishal, Mrunmay and manoj, who were always there for all the support, discussions and help with one or the other chemicals/reagents in emergency situations. I would also thank my other batch mates, Ashraf, Anupam, Abhinay, Praveen, Tarig, Khyati, Heena, Nidhi and Mandavi for making the experience of the course work very delightful and competitive. I would like to thank my dear friend Ankush for not only helping me in thesis writing but also for his great company throughout my PhD tenure.

I want to thanks my friend Manish, Sunil sir, and KJ sir, Virendra, Kulbhushan and Rajesh for giving me support during my difficult time in PhD tenure.

I want to thank my old friend Ankur, Vijay and Rakesh for making my life full of enjoyment.

The financial assistance from CSIR and NAIP in the form of fellowship is duly acknowledged.

Naveen
