ACKNOWLEDGEMENTS

Banasthali Vidyapith provided me with one of the best working environment I have ever experienced. So, first I would like to thank Prof Aditya Shastri (Vice Chancellor, Banasthali Vidyapith) to provide me with this opportunity to work under the research group of this esteemed institution.

I would like to extend a special thanks to Dr Chandra Kumari (Associate Professor, Department of Human Development, Banasthali Vidyapith). She has been a constant source of knowledge and motivation to work on this project. No matter how bizarre my curiosity was, she always provided me with an answer. I would also like to thank each and every member of National Institute for the Visually Handicapped (NIVH), Dehradun who helped me in each and every possible manner ranging from technical to social issues. I would like to thank Mr. Surendra Dhalwal (Clinical Psychologist) from NIVH who helped me in building my concepts in the field of vision impairment which I eventually applied in my project.

I also record my thanks to Mr Chirayu Batra (Research Member, Nuclear Research Group of San Piero a Grado, Pisa, Italy) for helping me in the completion of my work. His contribution was invaluable as he was the source of constant inspiration throughout my research.

Thanks to my family and parents who have always supported me and has always been an example of righteousness and belief, which makes me fearless in taking any big step.
