## CHAPTER 1 INTRODUCTION

1.1 General
1.2 Rivers as a Link in the Geochemical Cycle
1.3 River Sediments
1.4 Physical and Chemical Characteristics of Sediments
1.5 Nutrients in Rivers
1.6 Heavy Metals in River Sediments
1.7 Factors Controlling Nutrient and Trace Metal Concentrations in Sediments
1.8 Chemical Fractions of Metals in Sediments (Speciation)
1.9 Environmental Implications of Increased Anthropogenic Influence on Concentrations of Nutrients and Metals
1.10 Objectives of the Present Work

## CHAPTER 2 STUDY AREA

2.1 General
2.2 The Brahmaputra river
2.3 Tributaries and their characteristics
2.4 The Channels of the Brahmaputra
2.5 General Geology
2.6 Soils
2.7 Land Use
2.8 Climate
2.9 Mineral and Forest Resources
2.10 Industry
2.11 Population
2.12 Environmental Problems

## CHAPTER 3 METHODOLOGY

## CHAPTER 4 RESULTS

4.1 Major Ion Chemistry
4.2 Sediment Size Distribution and Textural Characteristics
4.3 Mineral Composition of the Sediments
4.4 Nutrient (C,N,P) Distribution and Fractionation
4.5 Metal Chemistry and Elemental Association
4.6 Distribution and Fractionation of Toxic Metals
4.7 Environmental Impact and Analysis
