

CONTENTS

Chapter	Sub Heading	Description	Page
1		INTRODUCTION	1 - 15
	1.1	Introduction	
	1.2	Purna Basin	
	1.3	A brief idea about geology and hydrogeology	
	1.4	Accessibility and approach	
	1.5	Magnitude of the problem	
	1.6	Aim and objective	
	1.7	Structuring the approach (system architecture)	
	1.8	Methodology (approach discipline)	
	1.9	Previous work	
2		RAINFALL, CLIMATE AND SOIL	16 - 30
	2.1	Introduction	
	2.2	Rainfall data and its analysis	
	2.3	Analytical summary	
	2.4	Climate	
	2.5	Soil	
3		GEOMORPHOLOGY	31 - 51
	3.1	Introduction	
	3.2	Physiography	
	3.3	Drainage pattern	
	3.4	Morphology of River Purna	
	3.5	Geomorphology	
	3.6	Tectonics and sedimentation	
	3.7	Geomorphic episode	
4		GEOLOGY, SUB-SURFACE LITHOLOGY AND STRUCTURE	52 - 82
	4.1	Introduction	
	4.2	Geology of the area	
	4.3	Sub-surface geology	
	4.4	Sub-surface lithology interpretation	
	4.5	Borehole geophysics	
	4.6	Interpretation for lithology and groundwater quality in topographic low area	

	4.7	Evidence of laterite	
	4.8	Basement rock topography	
	4.9	Structure and neo-tectonic activities	
	4.10	Evidence of earthquake in the region	
5		HYDROGEOLOGY	83 - 110
	5.1	Introduction	
	5.2	General groundwater conditions	
	5.3	Granular zone and yield relationship	
	5.4	Aquifer yield and reduction with time	
	5.5	Depth variation	
	5.6	Groundwater level fluctuation and its trend	
6		GEOHYDROCHEMISTRY	111 - 148
	6.1	Introduction	
	6.2	General trend	
	6.3	Different water sources and parameters correlation	
	6.4	Anion – cation relationship	
	6.5	Hydrochemical facies (classification and its relation to flow regime)	
	6.6	Groundwater salinity	
	6.7	Salinity in Purna alluvium	
	6.8	Cause/causes – Purna alluvial salinity	
7		PLANNING AND MANAGEMENT	149 - 198
	7.1	Introduction	
	7.2	Concept and need	
	7.3	Importance of groundwater	
	7.4	Resource sustainability	
	7.5	Management elements and paradigm	
	7.6	Extraction strategy	
	7.7	Drought management	
	7.8	Flood management	
	7.9	Sedimentation and management	
	7.10	Irrigation projects and management	
	7.11	Agriculture sector and management	
	7.12	Industrial water management	
	7.13	Conjunctive use management	
	7.14	Watershed management (rain water harvesting, water conservation and artificial recharge).	

8	7.15	Environmental impact assessment	199 - 211
	7.16	Drinking water source management	
	7.17	Water education, women role and gender sensitization	
	7.18	Groundwater Protection Act	
	PREVAILING SCENARIO AND RECOMMENDATION MATRIX		
	8.1	Introduction	
8.2	Prevailing scenario		
8.3	Recommendation matrix
