Acknowledgement

My thesis would be incomplete if I do not mention a few words of gratitude towards all who helped me in my endeavors. I am indebted to my research supervisor Dr. P.S. Khillare, for his valuable guidance, excellent supervision, and constructive suggestions, which helped me a lot to pursue this research work smoothly. His enthusiastic approach was a constant source of inspiration. I gratefully acknowledge and thank him for his initiation and support throughout the course of my work, I learnt independent and professional way of working under his guidance. He patiently reviewed all the drafts and his uncompromising attention to detail has helped enormously in the preparation of this thesis. His wide knowledge and logical way of thinking have been of great value for me. His understanding, encouraging and personal guidance have provided a good basis for the present thesis. He challenged me to set my benchmark even higher and to look for solutions to problems rather than focus on the problem. I learned to believe in my future, my work and myself. Working under his guidance was a fine training which I would cherish all my life.

I extend my thanks to Prof. V.K. Jain, Dean, School of Environmental Sciences for providing me the necessary facilities to carry out my research work.

I would like to thank to all the faculty members and staff members of School of Environmental Sciences for their kind support during the study period. I especially thank Rawat Ji for being very co-operative through-out my stay in this school. I also thank Sharma Ji and Gaikwad Ji for being generous and helping during working in the CIF.

I am thankful to Hoshiar Singhji for being very co-operative whenever required.

The SatPaul Mittal fellowship granted by IAPPD for the study period is sincerely acknowledged.

I thank Om Prakash who was supportive in the lab. I also thank Puneeta for her out of the way help.
I would like to extend my heartfelt thanks to Sharmila and Vijay Sridhar who helped me a lot during the course of this work. It is really difficult to acknowledge their unconditional support in few words. Vijay Sridhar accompanied me during the whole sampling period. Sharmila also helped me in my sampling. Sharmila has helped me at each and every step, the best possible way one can do. She always tolerated my mood swings without ever complaining. Both of them were my key support during all the work and life pressures.

I also take this opportunity to express my thanks to my friends Gurmeet, Charu and Neeti for their unconditional support and motivation. Gurmeet has been like a pillar of support during all the ups and downs. I could rely on him for any adverse conditions. He helped me academically apart from providing great moral support. His critical suggestions have always been of great help.

I would like to thank my classmates Tanushree, Anjali, Alifyah, Amit Prakash, Mansi, Rajneesh, Chuba, Dipo, Mustafa and Jyoti for their moral support. I would like to thank Sudesh di for helping me in site location for my sampling work. I am thankful to Sutapa di and Deepika di for their support. I wish to thank Miti, who was always there to cheer me up after long and monotonous working hours in lab.

I cannot eschew to mention my family members and near ones, who deserve more than a written acknowledgement. It is primarily, the sacrifices they made for my education and unconditional support, which has sustained my confidence throughout my life. I am thankful to my sister Shweta who helped me in the compilation of this thesis. She helped me in making the pictures and map apart from the moral support. I would also like to acknowledge my brother Nitin and sister Shruti for always being very helpful and supportive.
