LIST OF TABLES

CHAPTER II

Table 2.4.1: 15 Countries with Highest Annual New Clinical Pneumonia Cases

Table 2.4.2: State wise Cases and Deaths due to Pneumonia in North East India 2012 (January to December)

CHAPTER IV

Table 4.1.1: List of collected medicinal plants used for treatment of pneumonia in various parts of Assam

Table 4.2.1: Antibacterial activity of the collected plants using disc diffusion method

Table 4.3.2.1: Minimum inhibitory concentration (MIC) of Mucuna pruriens Petroleum ether (PE), Chloroform (CHF), Methanol (MT) and Aqueous Extracts

Table 4.3.2.2: Minimum Bactericidal concentration (MBC) of Mucuna pruriens Petroleum ether (PE), Chloroform (CHF), Methanol (MT) and Aqueous Extracts

Table 4.3.3.1: Phytochemical analysis of Petorleum ether, Chloroform, Methanol and Aqueous extract of M. pruriens

Table 4.3.4.1: Chemical composition (%) of M. pruriens Chloroform extract

Table 4.7.2.1: Minimum inhibitory concentration (MIC) of L. salicifolia Petroleum ether (PE), Chloroform (CHF), Methanol (MT) and Aqueous Extracts (AQ)

Table 4.7.2.2: Minimum Bactericidal concentration (MBC) of L. salicifolia Petroleum ether, Chloroform, Methanol and Aqueous Extracts

Table 4.7.4.1: Phytochemical analysis of Petorleum ether, Chloroform, Methanol and Aqueous extract of L. salicifolia leaf extract

Table 4.10.4.1: Chemical composition of L. salicifolia chloroform fraction 1
Table 4.10.5.1.1: Growth Inhibition of *E. coli*, *S. aureus* and *P. aeruginosa* by Fraction 1a, Fraction 1b, Fraction 1c, Fraction 1d and Fraction 1e using Disc diffusion method of *L. salicifolia*
