Contents

1 Introduction & Objectives 1-3

2 Background

2.1 Water Protein Interaction 4-15
   2.1.1 Hydration and protein behavior
   2.1.2 Role of water in protein structure and function
   2.1.3 Role of water in protein folding
   2.1.4 Role of water in protein denaturation

2.2 Protein Behavior in Mixed Solvent System 16-23
   2.2.1 Interaction of protein surfaces with water-cosolvent mixtures
   2.2.2 Preferential interaction of water and cosolvents with protein
   2.2.3 Behavior of enzymes in organic medium

2.3 Xylanase 24-43
   2.3.1 Classification of xylanases
   2.3.2 Xylan: The natural substrate for xylanases
   2.3.3 Catalytic mechanism of xylanases
   2.3.4 Structure of xylanase
   2.3.5 Active site architecture and substrate binding
   2.3.6 Cord, α-helix and Thumb Region
   2.3.7 Stability and pH dependence of xylanase
3 Cloning, Expression and Purification of Xylanase

3.1 Introduction

3.2 Materials and Methods

3.3 Results

3.3.1 Cloning of xylanase gene in various expression vectors

3.3.2 Expression, localization, purification, western blot analysis and silver staining of the recombinant xylanase

3.3.3 Enzyme assay and Specific activity

3.4 Discussion

4 Characterization of Xylanase in DMSO-Water Mixtures

4.1 Introduction

4.2 Materials and Methods

4.3 Results & Discussion

4.3.1 Activity profile of xylanase in polar aprotic solvents

4.3.2 pH and temperature activity profile of xylanase in DMSO-Water mixtures

4.3.3 Calculation of Michaelis-Menten constant ($K_m$) and $V_{max}$

4.3.4 Influence of DMSO on the temperature induced inactivation of xylanase

4.3.5 Circular Dichroism of xylanase in DMSO-Water mixtures

4.3.6 Effect of DMSO on the chemical denaturation of xylanase

4.3.7 ANS binding to xylanase
4.3.8 Time resolved fluorescence measurements

5 MD Simulation of Xylanase in DMSO-Water Mixtures 114-148

5.1 Introduction

5.2 Methods

5.3 Results

5.3.1 Fluctuations and drifts of energy components

5.3.2 Movements from the initial structure

5.3.3 Analysis of structure fluctuations

5.3.4 Correlated motion in xylanase

5.3.5 Xylanase-Solvent interaction

5.4 Discussion

6 Conclusion and Future Directions 149-150

7 Bibliography 151-182
