# INDEX

## 1 INTRODUCTION 1-11

1.1 Introduction 1

1.2 Classification of Thermoeastic Problems 2

1.3 Material Classification 2

1.4 Heat Transfer Mechanisms 3

1.5 Boundary Conditions 4

1.6 The Differential Equation of Heat Conduction 6

1.6.1 Consider the following cases 7

1.6.2 Homogeneous and Non-homogeneous boundary value problems of heat conduction 7

1.7 The Integral –Transform Technique 9

1.8 Necessity of work 9

1.9 Aim and Scope 10

1.10 Organization 10

## 2 LITERATURE SURVEY 12-45

2.1 Comments on Literature Reviewed 45
3 DEVELOPMENT OF THEORY AND ANALYTICAL SOLUTION

3.1 Mathematical Formulation

3.2 Solution for Temperature Change
   3.2.1 Application of Laplace Transform
   3.2.2 General Solution of Ordinary Differential Equation
   3.2.3 Particular Solution of Ordinary Differential Equation
   3.2.4 Application of Inverse Laplace Transform
   3.2.5 Final Solution for Temperature Distribution

3.3 Determination of Thermal Stresses

3.4 Mathematical Formulation
   3.4.1 Application of Laplace Transform
   3.4.2 General Solution of Ordinary Differential Equation
   3.4.3 Particular Solution of Ordinary Differential Equation
   3.4.4 Application of Inverse Laplace Transform.
   3.4.5 Final Solution for Temperature Distribution

3.5 Determination of Thermal Stresses

3.6 Solution for Temperature Change
   3.6.1 Application of Laplace Transform
   3.6.2 General Solution of Ordinary Differential Equation
   3.6.3 Particular Solution of Ordinary Differential Equation
   3.6.4 Application of Inverse Laplace Transform
   3.6.5 Determination of Thermal Stresses Function
   3.6.6 Determination of Thermal Stress component in x-direction
   3.6.7 Determination of Thermal Stress component in y-direction
3.6.8 Determination of Thermal Stress component in Resultant-direction 67

3.7 The Solution for temperature change 69

3.8 Determination of Thermal Stress Function 71

4 RESULTS AND DISCUSSION 75-89

4.1 Numerical Calculation 75

4.2 Convergence Analysis of Series Solution 75

4.3 Numerical Results for example 2 77

4.4 Convergence Analysis of Series Solution 77

4.5 Numerical Results for example 3 79

4.6 Convergence Analysis of Series Solution 79

4.7 Numerical Results for example 4 84

4.8 Discussion of Results 88

5 CONCLUSIONS 90-91

REFERENCES 92-104
