Acknowledgement

First and foremost, I express thanks to the God for all of his blessings. for enabling me to achieve what I have achieved. I had never thought that I would have come this far, but his plans are often much greater than our expectation.

I like to thank my parents. I am deeply grateful for your love, your sacrifice, and every prayer that you say for me. Your infinite support has allowed me to pursue my dreams and encourage me all the way. Being your son is the best blessing that I have!

I am indebted to my guide, Dr. Vibhor Paliwal. His constant guidance, support and encouragement have led me every step of the way. I cannot thank him enough, as not only his professional knowledge provided me with the most valuable feedbacks on my work, they also offer an extremely helpful recommendation for being an early career researcher. Dr. Vibhor you are my inspiration!

It would be much more difficult to write this thesis without the help and support from my beautiful friends. I believe that you guys are the angels sent by God; not only cheer me up when times were difficult, but also make my Ph.D. life so colorful and memorable.

I also like to give big thanks to everyone who responded or forwarded my questionnaire. It was quite challenging to collect a huge amount of data in such a less duration of time, however thanks to you, strangers- my work is done with so many anonymous smiles and encouragement. It was a lovely surprise to meet so many kind strangers in a day.

These years have been the best days of my life. There are so many things and people to thank, and although I cannot write down all of it, I have not forgotten anyone. This thesis not only shows my work in the previous years, but also reflects the love, the kindness, and all the precious sides of people around me. Thank you all.
