ACKNOWLEDGEMENTS

I take this opportunity to express my deep sense of gratitude to my teacher and guide Prof. M.S. Wadia for his excellent guidance, valuable and vital suggestions throughout the tenure of this work without which this work would have remained incomplete.

I am also grateful to Prof. N.S. Narasimhan, former Head of the Chemistry Department for providing the necessary facilities. I am very much thankful to Dr. S.L. Kelkar for spending his valuable time for me.

I also express my heartfelt thanks to Principal Fr. A. Barreto and Principal Fr. I. Soraes of Vidya Bhavan School and College, Pune 411 016, for offering the cooperation in my continuing the research work at the Department of Chemistry, University of Poona, Pune during the tenure of this work.

I thank my respected teachers Dr. R.S. Mali, Dr. (Mrs.) R.S. Kusurkar, Dr. D.D. Dhavale, Dr. M.G. Kulkarni, for their generous help, useful suggestions and fruitful discussions.
I consider myself very lucky to have worked in the cheerful company of several of my colleagues, especially Dr. P.S. Johar, Mr. C.P. Phadke, A. Sayed and S.Y. Deshmukh. Innumerable thanks to them for being with me throughout the ups and downs. I am indebted to all other research students of this Department for their whole-hearted cooperation.

I am thankful to Smt. J.P. Chaudhari and Mr. A.P. Gadgil for NMR, IR, UV spectra and microanalysis. The assistance provided by B.B. Pawar for neat figures is gratefully acknowledged. I thank Miss L.N. Pavangadkar for clean and speedy typing of this thesis.

Finally, I am eternally grateful to my father Bhau for courageous support and my mother who provided the driving force for the completion of this work.

Department of Chemistry
University of Poona
Pune - 411 007.
