Acknowledgements

It is my pleasant duty to express my indebtedness and sincere thanks to Prof. V. S. Gananathan, Head of the Department of Geography, University of Poona, for kindly suggesting to me the subject for the Thesis, and for his valuable guidance throughout the course of its completion. The instructive discussions and encouraging advice of the guide at all stages are very much responsible for bringing out the work in the present form.

My thanks are also due to the Deputy Director General of Observatories, Poona, for supplying me with the necessary climatological data; to all the officers at the different district and taluka head-quarters for furnishing me with all available information; and to the many individuals, whom I interviewed in course of my field trips, for their kind co-operation fully extended to me.

I shall be failing in my duty if I do not mention my friend Shri J. V. Mandlik, M.Sc., who is responsible for the excellent typing of this work.

Department of Geography
University of Poona.
