Abstract vi
List of tables xiii
List of figures and graphs xiv

Chapter 1. Introduction
1.1 Material considerations 1
1.2 Overview of InBi and In$_2$Se$_3$ compounds 5
1.3 Nucleation and growth mechanism 14
1.4 Bulk crystallization 17
1.4.1 Solution growth 17
1.4.2 Melt growth 18
1.4.3 Vapor growth 20
1.5 Objectives 21

Chapter 2. Experimental techniques
2.1 Introduction 24
2.2 Preparation of stoichiometric charge 24
2.3 Horizontal directional solidification 26
2.4 Closed tube sublimation 28
2.5 Characterization tools 28
2.5.1 Optical microscope 29
2.5.2 Scanning electron microscope 30
2.5.3 Transmission electron microscope 31
2.5.4 Atomic force microscope 32
2.5.5 Energy dispersive analysis by X-rays 33
2.5.6 X-ray diffraction studies 34
2.5.7 Electrical measurements 35
2.5.8 Hall effect measurements 37
2.5.9 Dielectric measurements 39
2.5.10 Differential scanning calorimetry 40
2.5.11 Microhardness testing 41
2.5.12 Raman spectroscopic analysis 42
2.5.13 Fourier transform infrared spectroscopy 43
2.5.14 Photoluminescence spectroscopy 44
2.5.15 Photoconductivity measurements 45
2.6 Conclusions 46

Chapter 3. Growth and characterization of directionally solidified InBi\textsubscript{1-x}Sb\textsubscript{x} crystals
3.1 Introduction 47
3.2 Crystal growth process 48
3.3 Composition and structural analysis 57
3.4 Raman spectroscopic studies 61
3.5 Thermal measurements 63
3.6 Electrical characterization 65
3.7 Microhardness studies 67
3.8 Fourier transform infrared spectroscopic studies 70
3.9 Dielectric measurements 73
3.10 Conclusions 77

Chapter 4. Effect of tellurium doping on properties of InBi crystals
4.1 Introduction 79
4.2 Growth of crystals 79
4.3 Surface topographical analysis 81
4.4 Structural and compositional analysis 84
4.5 Dielectric properties 88
4.6 Differential scanning calorimetric analysis 91
4.7 Mechanical characterization 93
4.8 Optical characterization 94
4.9 Resistivity measurements 96
4.10 Conclusions 98

Chapter 5. Properties of gamma irradiated InBi$_{1-x}$Sb$_x$
and InBi$_{1-x}$Te$_x$ crystals
5.1 Introduction 99
5.2 Microstructural analysis 100
5.3 Dielectric studies 110
5.4 Optical properties 114
5.5 Conclusions 115

Chapter 6. Sublimation process and characterization of
$\gamma$-In$_2$Se$_3$ crystals
6.1 Introduction 116
6.2 Vapor deposition of In$_2$Se$_3$ crystals 116
6.3 Morphological, structural and elemental analysis 119
6.4 Raman spectroscopic studies 127
6.5 Transmittance studies 128
6.6 Photoluminiscence analysis 130
6.7 Photoconductivity studies 131
6.8 Electrical measurements 133
6.9 Microindentation analysis 133
6.10 Conclusions 136
Chapter 7. Summary and scope

7.1 Summary and scope 138
