ACKNOWLEDGEMENT

Its first time in five years to halt, look back and walk down the memory lane. Five years is a petty long time to contribute huge number of experiences and encounter good number of people who directly or indirectly helped me in crossing this high energy barrier and reach my final destination.

Since, this struggle revolves around achieving the highest and most prestigious academic degree, so, a true confession at the fag end of the research programme, solicits those enlightened personalities without whom, this day wouldn’t have stood worthwhile in my life.

First of all, my supervisor Dr. Uday Chand Ghosh (Ex-Associate Professor, Department of Chemistry and Bio-chemistry, Presidency College) who gave me this opportunity, believed in my abilities, understood my commitment and withstood my severe dynamism. He has been a father figure for me who not only guided me all throughout this five years of research work but also realized my personal sentimental level that is very vindictive in every one’s life. It is very true that every research scholar do avail this opportunity to acknowledge their supervisor’s for their academic excellence, research training, scientific innovative thoughts and I am no exception. In addition, I can never forget his help during every rough phase of my life when my head was dropping and target reflected mirage in a barren desert.

I am thankful to Prof. Malabika Sarkar (Vice-Chancellor, Presidency University), Prabir Dasgupta (Registrar, Presidency University), Prof. Sanjib Ghosh (Ex-Principal as well as ex-HOD, Chemistry, Presidency College, Kolkata), Prof. Dipak Kumar Mondal (Ex-Head, Presidency University), Prof. Gandhi Kumar Kar (Head, Presidency University), Prof. (Mrs). S. Gangopadhyay, Dr. B. C. Kundu, Dr. G. C. Mukherjee, Dr. P. K. Panja, Dr. N. C. Ta, Prof. A. K. Sarkar, Dr. G. Chatterjee, Prof. M. Biswas Dr. S. K. Saha, Dr. D. Majhi, Dr. A. Bose, Dr. P. Ghosh, Dr. Arup Banerjee, Dr. Arup Ghosh, Dr. Abdur Goni, Dr. Subrata Saha, Dr. Samrajnee Dutta for their valuable, priceless suggestions and encouragement.

I am also thankful to Dr. Arabindu Nayek (Professor, Presidency University), Prof. Ashutosh Ghosh (Head, Department of Chemistry, Calcutta University), Prof. Nihar Ranjan Ray (Retired,
Saha Institute of Nuclear Physics), Dr. Pintu Sen (Department of Physics, VECC) for providing me instrumental facilities from time to time.

I regard myself to be very lucky to enjoy the companionship of all faculty members of Manindra Chandra College, Kolkata like Dr. Diptendu Bhusan Dutta, Dr. Santanu Bhattacharya, Dr. Parimal Kundu, Dr. Suranjana Chatterjee, Dr. Partha Dutta who has always been my extreme well-wishers.

Thankful appreciation is further extended to my ex-labmates Dr. Biswaranjan Manna, Dr. Subhas Chandra Bhat, Dr. Saswati Goswami, Dr. Krishna Biswas, Dr. Kaushik Gupta, Dr. Sushanta Debnath for their profound knowledge, research experience and helpful suggestions. Biswada, Subhasda and Sushanta da owe the credit to initiate, standardize and finally establish this mode of study from our laboratory through single component system. Krishnada and Kaushikda stole the show by excelling over the set platform and deciphering its unexplored tributaries of this main stream research. My present lab mates Indranilda, Debabrata and Abir who has seriously contributed to the extension of surface chemistry research in the field of polymer nano-composites, conducting materials, surface coated metal based adsorbents, transferring of lab-based technologies to industrially viable field performance filter.

My extended research family both ex and present also deserves special notice in standing beside me in my good as well as bad times. They are Sayan, Harishankar, Abhishek, Subhodipda, Pinkidi, Anirbanda, Shyamda, Manini, Swarnakamal, Shyamal, Sugata, Sagarika, Ipsita, Jayita, Nirmalyada, Arjunda, Dolondi, Sudiptoda, Pradyutda, Deb dulalda, Sandipda, Ananyadi, Farukda, Rumpadi, Khokon, Prasanta, Moumita, Partha, Sujitda, Anisurda, Pritha, Debasish, Suchandra, Arijit, Saikat, Rubina, Payel, Soma, Piyasa.

I had lost my father Late Subrata Basu in my early childhood whose absence was replenished and boldly accepted by my paternal uncle Shri Jayanta Bose who is an idol character of my life. He deserves the credit of grooming me up to this level. Unfortunately, his demise two years back left me speechless and in utter pain.

I am also indebted to those late members of my family whose blessings and inspiration helped me sail smoothly over thorn laden paths. An inner voice and conscience, self reproducible within
myself unveiled their mental presence, involvement and hold over my personal and academic life.

My special gratitude to mama, mami, bhai, Shymal mama, Kanchamama, Tilki, in-law core house like baro masi, baro meso, chotto, masi, chotto meso, Suprateek, Madhuri, Shamik, Runa, bordibhai, chordibhai, chottokaku, chotto kakima, Tori.

My elder brothers’ dadabhai, Bublada and my elder sisters’ didia and didi also kept renewing my confidence from time to time.

Mom and dad (in-law) deserve my extreme reverence for treating me like their daughter, sparing me all the time and provided me perfect research environment to sustain online and offline research culture and productivity of work.

My mother (Mrs.Tiyasa Basu) had been a constant source of inspiration in my life and plugged me time to time with her unaccomplished dream. Words will fall short off to pen down her contribution in my life and full credit goes to her to rear me up through her hard times.

Last but not the least, that eminent personality of my life Mr. Dipanjan De, my husband who had realized my dream, co-operated and sacrificed to the fullest extent to make this day shine brighter. He had been my friend, philosopher and guide who consoled me during those days of my low research output and kept my frustrations and depression under control. He had been very understanding in my life and his constant source of encouragement penetrated my soul, opened up unexplored avenues and helped me to excel through scientific challenges of the present world.

I am thankful to all non-teaching staff of the Department of Chemistry, Presidency University with special reference to Baloramda, Sushantada and Rintuda.
