Contents

Chapter I:
Introduction

1.1 Preliminary
1.2 Statement of the Problem
1.3 Reasons for Selection of the Topic
1.4 Collection of Data
1.5 Literature Review
1.6 Objectives of the Study
1.7 Hypotheses
1.8 Methodology
1.9 Scheme of Study

Ch. I: Introduction
Ch. II: Technology Evolution That’s Transforming Property
Ch. III: Copyright in Computer Software: Literally ‘literary’ Protection- EU/UK and USA Experience
Ch. IV: Software Patents in EU/UK and USA: Patently Necessary?
Ch. V: No Soft Option: Need of New Legal Regime for Protection of Computer Programs in India
Ch. VI: Conclusion and Suggestions

Chapter II:
Technology Evolution That’s Transforming Property

2.1 Introduction
2.2 “Property: Meaning”
2.3 Intellectual property: Intangible, Incorporeal Possession
   2.3.1 “Meaning”
2.3.2 “Nature and Scope”

2.4 Software Industry: Phoenix of Indian Economy

2.5 Definition of Computer Program

2.6 Computer Program: A Distinct Subject Matter

2.7 Computer programs: Need of “Adequate” Intellectual Protection

2.8 Conflict of interests:

2.8.1 Individual Interest

2.8.2 Social Interest

2.8.3 State Interest

2.9 Conclusion

Chapter III:

Copyright in Computer Software: Literally ‘literary’ Protection- UK and USA Experience

3.1 Introduction

3.2 Computer Programs: Copyright

3.2.1 Scope of Copyright: Idea/Expression Dichotomy

3.2.2 Literally ‘Literary Protection’: United Kingdom

3.3 Computer Program: Need for Expanding Horizons of Copyright Protection

3.3.1 Protection of Non-Literal Elements of a Computer Program

3.3.1.1 United States of America

3.3.1.2 United Kingdom

3.3.2 Interoperability of Computer Program vis-a-vis Reverse Engineering: Exception to Infringement

3.3.2.1 United States of America: ‘Fair use doctrine’ as Liberator against Infringement
Chapter IV: Software Patents in EU/UK and USA: Patently Necessary?

4.1 Introduction
4.2 Computer programs: “Softly” patentable in UK/Europe?
   4.2.1 Software Patents: When software is not “a program for a computer as such”
   4.2.2 Technical effect: Who am I?
4.3 Patentability in the EPO
4.4 Patenting in United Kingdom
4.5 Patenting in United States of America
4.6 Difference between the EU and US approach to patentability of computer programs
   4.7.1 Advancement in Technology Vs a Vs need of better protection
   4.7.2 To meet the competition from overseas competitor
   4.7.3 Remove ambiguity present in different EU state approaches
   4.7.4 Art 27 of the TRIPS Agreement
4.8 Conclusion
Chapter V:
No Soft Option: Need of New Legal Regime for Protection of Computer Programs in India

5.1 Introduction

5.2 Evolution of the Software Industry in India

5.2.1 Pre-1984

5.2.2 1984-1990: Policy Restrictions Eased

5.2.3 1990-Date: Policy Support for Industry Growth

5.3 Software Industry in India: Need for Strong IP Protection

5.4 Intellectual Property Protection in India

5.5 Protection of Computer Program: Indian IP Regime

5.5.1 Information Technology Act, 2000

5.5.2 Indian Copyright Act, 1957

5.5.2.1 “Copyright”

5.5.2.2 “Idea and Expression Dichotomy

5.5.2.3 Computer Programs: “Source Code and Object Code”

5.5.2.4 Reverse Engineering

5.5.3 Patent Act, 1970

5.6 Conclusion

Chapter VI:
Conclusion and Suggestions

6.1 Introduction

6.2 Against Software Patenting:

6.2.1 Long and Expensive Process

6.2.2 Dual Protection is Over Protection

6.2.3 Difficulty in Searching for Prior Art

6.2.4 Rapid Evolution of Software Products: Patent is no Match
6.2.5 Anti Innovation
6.2.6 Being Against Small and Medium Sized Industry
6.2.7 Against Open Software Movement

6.3 In support of Patenting:
6.3.1 Effective Process
6.3.2 Adequate Protection and Not Over Protection
6.3.3 Prior Art: Requirement Not a Bar to Innovation
6.3.4 Patent is Technology Specific
6.3.5 Stimulate Research
6.3.6 For Small and Medium Sized Industry
6.3.7 Not against Open Source Movement

6.4 Conclusion and Suggestions
