Chapter-1

INTRODUCTION 1-94

i) The selection of research problem 3

ii) Description of variables involved 5

a. Pro-social behaviour 4 5

b. Self-concept 22

c. Personality 30

d. Socio-economic status 63

iii) Objective of the present study 69

iv) Hypothesis of the present study 81

v) Importance of the present study 93

Chapter-2

REVIEW OF RELATED STUDIES 95-107

Chapter-3

RESEARCH METHODS AND PROCEDURES 108-126

a. The Sample 108

b. Design and variable involved 108

c. The tools used 109

d. The collection of data 125

e. The statistical technique used 126

Chapter-4

THE DATA ANALYSIS & DISCUSSION 127-315

Part A : Overall comparison of the self-concept of male & female students 128

Part B : Overall comparison of the self-concept of high & low socio-economic status students. 132

Part C : Overall comparison of the self-concept of high & low altruism. 136

Part D : Overall comparison of the self-concept of Introvert & Extrovert type personality. 138
Part E: The effect of sex (male & female) and altruism (high & low) on self-concept.

Part F: The effect of sex (male & female) and socioeconomic status (high & low) on self-concept.

Part G: The effect of sex (male and female) and type of personality (extraversion and introversion) on self-concept.

Part H: The effect of altruism (high & low) and socioeconomic status (high and low) on self-concept.

Part I: The effect of altruism (high & low) and types of personality (extraversion & introversion) on self-concept.

Part J: The effect of Socio-economics status (high & Low) and type of personality (extraversion & introversion)) on self-concept.

Conclusion

Chapter 5

SUMMARY

Bibliography

Appendix

(A) Test Paper
   i) Altruism Scale
   ii) Self-concept Scale
   iii) Extraversion Introversion Inventory (E.I.I.)
   iv) Socio-economic status

(B) Raw Scores (Data Sheet)
