Acknowledgements

It is with immense pleasure that I acknowledge my gratitude to my supervisors, Professor V.V.Krishna (Chairman, Centre for Studies in Science Policy, JNU) and Dr Mruthyunjaya (Director, National Centre for Agricultural Economics and Policy Research, ICAR, New Delhi) for their scholastic guidance and sagacious suggestions throughout this study. Their immense generosity and affection bestowed on me goes much beyond their formal obligations as Supervisors.

I thank the Board of Management of the National Science Foundation (NSF), Colombo, Sri Lanka for providing me with the opportunity to take up this study and granting me overseas study leave for the purpose. I also thank Mr M. Watson, Director (NSF) and Mr. W. Amaradasa (Director, Scientific Affairs, NSF) for their support extended to me.

I acknowledge, with deep gratitude, the sustained encouragement and support I received from Emeritus Professor Y.D.A. Senanayake, which inspired and motivated me initially. My thanks are also due to Professor H.P.M.Gunasena, Former Director of the Post Graduate Institute of Agriculture, University of Peradeniya, Sri Lanka and Dr D. Kirtisinghe, Former Executive Director, Council for Agricultural Research Policy, Sri Lanka, for having confidence in me when they recommended me for the two year Direct PhD Programme at JNU.

I also like to record my gratitude to Professor Ashok Parthasarathi, the former Chairman of the Centre for Studies in Science Policy (CSSP), JNU for extending his full support and using his personal contacts for arranging my field visits to Central Rice Research Institute (CRRI), Cuttack and M.S.Swaminathan Research Foundation (MSSRF), Chennai. I thank all the Faculty members of the CSSP for their useful suggestions and making themselves available whenever I was in need of help. My thanks are also due to Mrs. Shyamala Krishnamurthy, Documentation Officer and the other Assistant Staff of the Centre for the support given by them.

I am extremely indebted to Professor B.N.Singh, Director, CRRI, Cuttack and Dr S Abeysiriwardene, Director, RR&D, Batalagoda for their willing help and unreserved cooperation given to me when I was conducting the questionnaire survey at their institutes.

My special thanks are due to Dr J.C.Katyal, DDG (Education), ICAR and Dr T. Balguru, Principal Scientist, NAARM, ICAR for the deep concern and keen interest evinced by them in the furtherance of my knowledge.

I gained immensely from the discussions I had with Dr Rajeswari Raina of NISTADS, New Delhi. Her PhD Thesis helped me to form a base to my study, which I acknowledge gratefully.

Just saying 'thank you' would be inadequate to acknowledge the care and concern shown towards me by Professor M.S.Swaminathan, Chairman of the MSSRF, Chennai, during my short stay at the Foundation and for the extremely useful discussions I had with him and his eminent staff.

The empirical research in this thesis would have not been possible without the cooperation of the scientists, both at the CRRI (India) and RR&D (Sri Lanka), and the other scientists in the NARS in both countries who have provided me with valuable data for this thesis. I thank them all.

Numerous individuals and institutions have contributed to this study and a brief acknowledgement can never do full justice to their individual and collective impact on the form and substance of this effort. Some of them must, therefore, forgive me for leaving them anonymous.
However, I must mention that the technical help given at the last minute by Mr A.P. Hettiarachchi, Programmer, MIS Unit of the NSF, is very much appreciated.

I thank Chamari, Shanika, Jaya, and Joyce, for being close to me and for their active and moral support. My friends at the NSF, Rohini, Subadra, Chathu, Renuka and Amila are remembered with many thanks for their encouragement and support given to me from that end.

I thank my batch mates and all the other Indian friends for their help given. They made my short stay at JNU, a very pleasant one.

It is with sadness I remember my father, who insisted that I should take up this study and is not there now, to see me completing it. My mother, sister and brother have always been silent pillars behind me.

I am grateful to my husband, Nimal, for his support at his personal and professional capacity. I admire his positive attitude towards my educational pursuits.

My two daughters, Charya and Madara deserve deepest and special thanks for cheerfully allowing my professional endeavors to encroach on their time.

My sincere thanks to my close relations and to Karuna, for taking good care of my family, during my stay in India.

Finally, I wish to place on record my gratefulness to the Swedish International Development Agency (SIDA) for providing me with financial support throughout the tenure of my research work.
