General Introduction	1 - 29	
Rational of the Work	30 - 32	
 <u>Chapter I : Section A</u>		
<u>In vitro</u> as well as <u>in vivo</u> effects of environmental carcinogens on mitochondrial macromolecular synthesis from various sources	33 - 60	
 <u>Chapter I : Section B</u>		
Effects of 2,2-bis-(p-chlorophenyl)- -1,1,1-trichloroethane (DDT) on mitochondrial protein and nucleic acid synthesis	61 - 77	
 <u>Chapter II</u> : Inhibition of deoxyribonucleic acid synthesis in isolated plant mitochon- dria by certain potent inhibitors and environmental carcinogens		78 - 99
 <u>Chapter III</u> : <u>In vitro</u> nucleic acid synthesis by purified DNA polymerases from hetero- logous sources in presence of environ- mental carcinogens		100 - 121
