Acknowledgements

A research is an extensive task and requires guidance and help of many individuals and institutes. It is hardly possible for a person to do it all alone.

Dr. Preeti Bhatt, Guide (Retd. Head of the Department of Music, S.N.D.T. Women's University, Mumbai), encouraged me to work on the topic 'Music Therapy'. Her guidance and encouragement throughout the research work was extremely helpful. I sincerely thank Dr. Preeti Bhatt for her continued guidance.

Dr. Premala Kale, Co-Guide (Retd. Head of the Department of Psychology, S.N.D.T. Women's University, Mumbai), provided valuable guidance regarding psychological aspects involved in the research. Dr. Kale's keen interest in the topic and persuasive attitude inspired me a great deal during the research work. Her guidance and suggestions helped me in presenting this thesis. I thank Dr. Premala Kale for this.

I thank Prof. Dr. Kale (Retd. Head of Department of Psychology, University of Mumbai) for the efforts he took to read the thesis and for his important suggestions.

My Guruji Prof. Sulabha Pishwikar, who taught me music in all its aspects, stood by me all through the research work - I am really grateful to her.

I am indebted to Dr. Neera Grover (Reader, Department of Music, S.N.D.T. Women's University, Mumbai), for her co-operation and encouragement during the research process.

I am grateful to the University Grants Commission for granting research fellowship for a period of four years, from the year 1998 through 2002.

I am grateful to my parents who are always with me throughout my music career.
Acknowledgements

I am thankful to my in-laws for their co-operation and encouragement during the research work.

I thank my husband, Mr. Vinayak Pujare, who was kind enough to read the entire manuscript and made many helpful comments. I must thank him for doing the graphical representation of the data.

I am thankful to the Ranade family (Pune), who provided their recording system necessary for recording of music pieces used in this research.

And last but not least, I would like to thank all the 'Subjects', who participated in the study; without their co-operation this endeavour would never have been begun.
