GENERAL INTRODUCTION 1
RATIONALE OF THE PRESENT STUDY 25
MATERIALS AND METHODS 27
CHAPTER - I : <i>Isolation, purification and characterization of fatty acid binding proteins from developing human placenta and fetal liver</i>	
INTRODUCTION 39
RESULTS 42
DISCUSSION 51
CHAPTER - II : <i>Role of FABP in regulating glucose-6-phosphate dehydrogenase activity in developing human placenta and fetal liver</i>	
INTRODUCTION 56
RESULTS 58
DISCUSSION 64
SUMMARY AND CONCLUSION 67
