ACKNOWLEDGMENTS

Word seems insufficient to express my gratitude and respect to Dr. Rajat Kumar De, whose encouragement, supervision and support from the preliminary to the concluding level enabled me to develop an understanding of the subject. He not only supervised my dissertation work, but also acted as an elder brother during the tenure of my research. Above all and the most needed, he provided me unflinching encouragement and support in various ways.

I am heartily thankful to my supervisor, Dr. Bibhas Chandra Dhara, for his guidance during my research. I owe a lot to him for providing me constant encouragement and affection throughout the last few years. His enthusiasm in research had motivated me. In addition, he was always accessible and willing to help me with my research.

I shall forever remain indebted to my parents. It is their constant encouragement, enthusiasm and support that has helped me throughout my dissertation work.

I take this opportunity to express heartfelt gratitude to my teachers and friends at the Machine Intelligencer Unit, Indian Statistical Unit, Department of Computer Science, Information Technology, Calcutta University and Jadavpur University. Thanks are due to all my friends for constant encouragement. Finally, a special note of thanks to all my colleagues in Netaji Subhash Engineering college. They provide me a wonderful working environment and constant encouragement for my research work.
