ACKNOWLEDGEMENTS

I first express my sincere gratitude to Dr. Chandi Charan Deb, Reader, Department of Physiology, Calcutta University, for his wise and able guidance in the work, without which it would not have been possible for me to pursue the present investigation.

I would like to express my indebtedness to Prof. S. R. Maitra, Head of the Department of Physiology, Calcutta University, for his valuable advice, suggestion and the keen interest and constant encouragement throughout the entire course of investigation.

I thankfully acknowledge the suggestion and sincere co-operation which I received from Dr. N. M. Biswas, Lecturer in Physiology, Calcutta University, Dr. M. C. Boral, Lecturer in Physiology, Ananda Mohan College, Calcutta, Dr. S. K. Dey, Post-doctoral Research Fellow, Kansas Medical Centre, Kansas, U.S.A. and Dr. A. K. Chatterjee, U.K.

I am thankful to Mr. Suradis Dutta and Mr. Arun Roy of the Department of Physiology, Ananda Mohan College, Calcutta and Dr. D. Sengupta, Lecturer in Biochemistry, Calcutta University for their co-operation and help which I received during the work.
Thanks are also due to Miss Namita Mallik, Miss Prativa Kaul, Mrs. Pranati Bagchi, Miss Bratati Biswas, Miss Suchitra Chatterjee, Mrs. Ratna Mukherjee, Mr. Dipak Sarkar, Mr. Sumantra Chandra, Miss Jayasree Basu, Mrs. Rina Banerjee of the Department of Physiology, Calcutta University, Mrs. Indira Chakravarty and Mr. Kanailal Mukherjee of the Department of Biochemistry, Calcutta University, Mr. Samar Roy of the Department of Applied Chemistry, Calcutta University, Mr. K. G. Hazra of 37, Belgachia Road, Calcutta, Dr. B. G. Hazra of National Chemical Laboratory, Poona, Miss Malati Keskar of M. G. M. Medical College, Jamshedpur and Miss Jayasree Sen Gupta of Kansas Medical Centre, Kansas, U.S.A., for their active co-operation.

I remain grateful to Dr. H. Ariyama, Dr. O. Nagase, Dr. Y. Abiko and Dr. M. Shimizu of Japan for their generous help and free supply of calcium-omega methyl pantothenic acid.

I also acknowledge with thanks the microphotography work done by Mr. Ranjit Kumar Bhattacharya of the Department of Physiology, Calcutta University.

I am also thankful to Mr. L. C. Dutta, Mr. P. C. Roy, Mr. M. Mazumdar, Mr. Ramkrishna Saha, Mr. N. N. Ghosh and Mr. G. G. Biswas of the Department of Physiology, Calcutta University, for the various assistances rendered by them.
I am also indebted to Mr. M. K. Basak for typing the manuscript and to my parents and relatives for their help which I received throughout my work.

I am also thankful to Council of Scientific and Industrial Research, New Delhi and Lady Tata Memorial Trust, Bombay for rendering financial assistance in carrying out the present work of the thesis.

Lastly I name Mr. Kritibash Jana, Mr. Lakshminarsyan Dube and Mr. Lakshman Paik who have helped me from time to time in various ways.
