ACKNOWLEDGEMENTS

The author expresses his deep sense of gratitude to Dr. P.K. Gangopadhyay, Professor of Geology, Presidency College for his guidance and supervision throughout the research work. Sincere thanks are given to Prof. A.K. Saha, Head of the Dept. of Geology for giving the laboratory facilities. Once again the author expresses his deep sense of gratitude to Sri S. Moitra of Fort Closter Industries, Howrah for arranging and carrying out the entire geochemical work in his laboratory. The author is highly grateful to Dr. V. Khiltova of the Institut of Precambrian Geology and Geochronology, Leningrad for carrying out the entire geochronological work at her department. Electron microprobe analysis was kindly done by Dr. A.B. Mukherjee of I.I.T., Kharagpur.

Furthermore the author appreciates co-operation extended by the station master, of Phulad, H.S. Jhala, R.S. Arya, Sub-divisional Inspector of Deogarh post office. The author conveys his best wishes to his colleague and friend Mr. J.S. Roy, Senior Research Fellow and Sri S. Mitra of the Department of Geology, Presidency College. The author is also grateful to Sri Somnath Sirkar for drafting the figures. The author appreciates the encouragement rendered by Sri A. Gangopadhyay, Research Associate in the Indian School of Mines Dhanbad, Dr. C. Bhattacharya, Lecturer in Geology in the University of Calcutta and Prof. G.S. Chatak of the Dept. of Geology, Presidency College, Calcutta.

Lastly the author gratefully acknowledges the financial assistance received from the University Grants Commission, New Delhi, for conducting the research work.
