ACKNOWLEDGEMENTS

On this page I take the opportunity of expressing my gratitude to all the persons who jointly co-operated with me to complete this thesis.

First and foremost, I gratefully acknowledge the advice and constructive criticisms of my respected teacher Prof. N. N. Das Gupta, Ph.D. (Lond.), F.N.A., former Palit Professor and Head of the Department of Physics, former Professor-in-Charge, Electron Microscope Centre, Calcutta University under whose guidance the work was accomplished. He had most patiently and sympathetically dealt with all my problems and at the same time led me towards successful completion of this work. I am also indebted to Prof. R. K. Poddar, Professor of Biophysics (lien), Vice Chancellor, Calcutta University and Prof. D. L. Bhattacharya, Professor-in-Charge, Electron Microscope Centre for their interest and co-operation in the present work.

I am specially grateful to Prof. S. Palchaudhuri, U. S. A. for his active interest and encouragement during the period of my research. I express deep sense of gratitude to my senior workers Dr. D. N. Goswami, Lac Research Institute, Ranchi and Dr. G. C. Das, U. S. A. for their helpful suggestions and critical comments at every stage of this work. Dr. Das had also helped me a lot by sending
important chemicals and gadgets; from time to time throughout the research period.

Thanks are due to Dr. E. Camerino, Italy; Dr. P. F. Wiley, U. S. A.; Dr. H. Loewe, W. Germany and Dr. M. Champagne, France for kindly supplying the drugs and histones as gifts and Prof. Th. Koller for his valuable comments.

I owe to Dr. U. Choudhury and Dr. A. Sen hearty acknowledgements for their active interest, valuable suggestions and constant encouragement during all stages of my research and correction of the manuscript of the thesis. I am also thankful to Dr. B. Bagchi and Dr. A. Ghosh, U. S. A. for their sympathetic attitude towards the present work. Next, thanks are due to my friends and fellow workers Mr. A. N. Ghosh, Mrs. A. Ganguly, Dr. D. Ghosh and Mr. S. K. Poddar for their sincere co-operation and cheerful company all throughout.

I am deeply grateful to my grand parents, parents, husband, sisters and other members of my family for their constant inspiration.

A special note of thanks are also due to Mr. P. K. Chakraborty for typing the thesis and Mr. C. S. Choudhury for constant assistance in laboratory work.
Lastly, I acknowledge my thanks to the Asiatic Society, University Grants Commission and Calcutta University for awarding M. N. Saha Research Scholarship, U. G. C. Junior and Senior Research Fellowships and K. M. Mallick Research Fellowship.

June 22, 1981.
