ACKNOWLEDGEMENT

I gratefully acknowledge my immense indebtedness to Professor K.P. Sen, Director, Institute of Post-Graduate Medical Education and Research and Director-Professor, Department of Pathology and Bacteriology, Institute of Post-Graduate Medical Education and Research, Calcutta for his valuable suggestions, continued guidance, and generous help without which it would have not been possible to complete this work.

I would like to express my gratitude to Dr. (Mrs) G. Banerjee, Assistant Professor, Virology, Institute of Post-Graduate Medical Education and Research, Calcutta who has helped me to tide over many a crisis.

I am grateful to Dr. S.K. Biswas, Reader, Dr. M.K. Choudhury, Department of Pathology and Bacteriology, Dr. K.L. Mukherjee, Professor and Head, Department of Biochemistry, Institute of Post-Graduate Medical Education and Research, Calcutta for their generous help.

I am grateful to Dr. A.M. Goon, Professor and Head, Department of Statistics, Presidency College,
Calcutta University for his valuable assistance in statistical analysis.

I am grateful to Dr. P. Saha, Reader, Saha Institute of Nuclear Physics, Calcutta for his help in electron microscopy and Dr. G. Mitra, Reader, Agriculture Chemistry, Orissa University of Agriculture and Technology, Bhubaneswar for his help in the analysis of amino acids.

I am grateful to the Vice Chancellor, Orissa University of Agriculture and Technology, Bhubaneswar for deputing me for Ph.D. under Teaching Faculty Improvement Competence Scheme and to the Indian Council of Agricultural Research, New Delhi for granting me a fellowship.

My thanks are due to Mr. J. Banerjee and Mrs. Uma Banerjee for their ungrudging technical assistance rendered to me.

I am also thankful to Mr. S. Dutta for kindly preparing the diagrams and to Mr. A. Roy for his cooperation in typing this thesis.

Thanks are due to the staff members of the Department of Pathology and Bacteriology for their help in various aspects.
