ACKNOWLEDGEMENT

It has been my privilege to work under the direct supervision of Prof. P.C. Sen Gupta, M.B., D. Phil. (C.U.), Department of Pathology, School of Tropical Medicine, Calcutta. He left much of his valuable time at my disposal in a most ungrudging manner. His mature judgement and lifelong experience in the subject were available throughout my work. I feel greatly honoured to offer my heart-felt thanks to him. I am also deeply indebted to him for the permission to carry on work in his laboratory and for the helpful suggestion and practical assistance rendered through him.

I am extremely grateful to Dr. N. Mukerjee, M.B.B.S., D.T.M., D.P.H. (C.U.), Officer-in-Charge (Retired), Leprosy Research Department, School of Tropical Medicine, Calcutta, for his constant help, suggestion and constructive criticism. He followed my work with keen interest and his helping hand was always available from the beginning to the end of my work.

My heart-felt gratitude goes to Dr. R. N. Chaudhuri, M.B., M.R.C.P. (Edin.), T.D.D. (Wales), F.R.C.P., F.N.I.; Director, School of Tropical Medicine, Calcutta, for his
keen interest in this work and the unrestricted facilities on which this work largely depended.

I offer my sincere thanks to the members of staff of the School, who helped me in anyway, particularly, to Prof. A. B. Choudhury, M.B., D. Phil. (C.U.), Department of Helminthology and Filariasis; Prof. J. K. Sarkar, M.B., D. Phil. (C.U.), D. Bact. (Lond.), Department of Virology; Dr. A. B. Mukherjee, M.B., D. Phil. (C.U.), D.C.P. (Lond.), Assistant Professor of Pathology; Sri R. M. Bose, Chemist; Shri K. L. Dutta; Shri S. Adhikari; Shri S. Ganguly; Shri M. Ganguly; and Shri K. P. Roy; laboratory assistants, School of Tropical Medicine, Calcutta.
