Abstract

Chapter – 1

Introduction

1.1 Wetland studies and its importance

1.2 Kole Wetland

1.3 Study area

1.4 Rivers, water Course and Drainage in Thrissur kole.

1.5 Geological features

1.6 Climatic Profile

1.7 Rice Cultivation

1.8 Fishing and other activities in kole wetland

1.9 Major objectives of study

1.10 Intensive study area

1.11 Study period

Chapter – II

Review of Literature

2.1 Wetland Studies

2.2 Physico-Chemical Parameter studies of wetland

2.3 Wetland Macrophytes

2.4 Fish Fauna

2.5 Avian Fauna

Chapter – III

The Physicochemical Characteristics of Air, Water and Soil

3.1 Introduction
Chapter IV

Macrophytes of Kole wetlands

4.1 Introduction
4.2 Methodology
4.3 Observation and Results
4.3.1 Types of vegetation in Kole wetlands.
4.3.2 Dominant families
4.3.3 Relative abundance of wetland macrophyte species in the study area
4.3.4 Dominant macrophytes of Kole wetlands
4.3.5 Abundance of wetland macrophytes in the intensive study sites.
4.3.6 Density of wetland macrophytes in Kole lands
4.3.7 Density of wetland Macrophytes based on habitat conditions
4.3.8 Seasonality of wetland macrophytes of Kole lands
4.3.9 Birds associated with the major tree species in Kole wetlands
4.4 Discussion

Chapter V

Fish Fauna of Kole wetland

5.1 Introduction
5.2 Methodology
5.3 Observation and Result
| 5.3.1 | Abundant status of kole land fishes | 111 |
| 5.3.2 | Status of kole land fishes based on IUCN criterion | 113 |
| 5.3.3 | Introduced species | 115 |
| 5.3.4 | Secondary freshwater fishes recorded from kole wetlands. | 116 |
| 5.3.5 | Density of fishes in kole wetlands. | 118 |
| 5.3.6 | The occurrence and abundance of fishes in the study sites. | 123 |
| 5.3.7 | Seasonality of fishes of kole wetlands | 125 |
| 5.4 | Diversity of fish community | 129 |
| 5.5 | Discussion | 131 |

### Chapter – VI

**Population studies of Avifauna of kole wetlands of Thrissur district.**

| 6.1 | Introduction | 144 |
| 6.2 | Methodology | 147 |
| 6.3 | Observation and Result | 150 |
| 6.4 | Density of birds of kole wetlands | 170 |
| 6.5 | Percentage frequency of birds in the study area | 174 |
| 6.6 | Migratory birds | 175 |
| 6.7 | Non-migratory birds | 182 |
| 6.8 | Resident/Migrant Bird Ratio | 183 |
| 6.9 | Population fluctuation of bird of kole wetlands | 186 |
| 6.10 | Population fluctuation of other important groups/family | 200 |
| 6.11 | Population fluctuation in the total number of species and total number of birds in the study area. | 211 |
| 6.12 | Birds that were steadily increasing in their number during 2009-2012 | 228 |
| 6.13 | Birds that were steadily decreasing in their number during 2009-2012 | 228 |
| 6.14 | Rare birds reported after a long gap | 229 |
| 6.15 | Birds noticed in all sites | 230 |
| 6.16 | Common birds in each study sites | 230 |
| 6.17 | Birds that occurred only in a single site | 231 |
| 6.18 | Abundant birds of kole wetland area | 232 |
| 6.19 | Rarely sited birds in the study area | 233 |
| 6.20 | Endemic birds of kole lands | 244 |
6.21 Birds showing >1% threshold of biogeographical population 246
6.22 Globally Threatened bird species recorded from kole wetland 247
6.23 Comparative occurrence of wetland bird species in the kole wetland with other wetlands. 253
6.24 Earlier studies of a Avifauna conducted in kole wetlands. 254
6.25 Heronries and Nesting of birds in and around kole wetlands of Thrissur district. 263
6.26 Correlation of birds with Physico-Chemical parameters 270
6.27 Discussion 271

Chapter VII

Habitat Changes and Habitat utilization by kole wetland birds

7.1 Introduction 316
7.2 Methodology 317
7.3 Observation and Results 318
7.3.1 Habitat changes in kole wetlands 318
7.3.2 Comparative data of different group of kole land birds based on habitat condition they used and migratory status 332
7.3.3 Correlation of abiotic and biotic factors with kole land birds in different habitat types/ conditions 333
7.4 Habitat utilization of birds in different study sites of kole wetlands 336
7.5 Major bird sightings in different study sites 354
7.6 Food and Feeding of kole wetland birds 356
7.7 Discussion 359

Chapter – VIII

Bird Community changes in kole wetland based on Climatic Seasons

8.1 Introduction 377
8.2 Methodology 377
8.3 Observation and Results 378
8.3.1 Seasonality of birds of kole wetlands 378
8.3.2 Dominant birds recorded in different climatic seasons 383
8.3.3 Seasonal Index 383
8.3.4 Seasonality of birds in the study sites of kole wetlands. 384
8.3.5 Seasonal variations in species richness of birds in the study sites 387
8.3.6 Seasonal variation in abundance of birds in the study sites 388
8.4. Discussion 389

Chapter IX
Conservation of Kole wetlands and its Avifauna
9.1 Introduction 396
9.2 Problems faced by kole land farmers 398
9.3 Major Threats of Avifauna of kole lands. 408
9.4 Conservation of kole land for cultivation 414
9.5 Additional Income for kole land farmers 416
9.6 Recommendations related to fishing 419
9.7 Recommendations related to kole cultivation 420
9.8 Recommendations and suggestions to protect avifauna 421

Summary 424
