ACKNOWLEDGEMENT

The work presented in this thesis would not have been possible without my close association with many people who were always there when I needed them the most. I take this opportunity to acknowledge them and extend my sincere gratitude for helping me to make this Ph.D. thesis a possibility.

I would like to start with the person who made the biggest difference in my life, my co-research guide, Dr.T.Srinivasan, for always being so kind, helpful and motivating. He has always been there for me with his fatherly hand whenever I needed it the most. His constant guidance, cooperation and support have always kept me going ahead. I owe a lot of gratitude to him for always being there for me and I feel privileged to be associated with a person like him during my life.

My special thanks should also go to my research guide, Dr.P.Y.Naidu. He has been there, in front of my eyes for last three and a half years, motivating and inspiring every bit of me towards new possibilities in life.

I am thankful to Prof. N. Lakshman Das, Principal, School of Life Sciences, GITAM Institute of Science, GITAM University for giving me an opportunity to work in this institute and making the facilities available for carrying out research.

I am grateful to Prof. S.V. Raja Gopal, Dr.B.Veerendra Kumar, Dr.P.Shanmuk Anand, Dr.M.Anitha, Dr.P.SaiKishore, Dr.P.Kiranmayi, Dept of Biotechnology, GITAM Institute of Science, GITAM University and to my beloved uncle Sri.C.H.Ayyanna Pathrudu for their timely suggestions and inspiration.

My acknowledgement will never be complete without the special mention of my lab seniors who have taught me the lab culture and have lived by example to make me understand the hard facts of life. I would like to acknowledge Dr.V.S.S.L. Prasad Talluri and Dr. N. Srinivas for all their support and motivation during the initial days of my stay in the lab.

I express my heart-felt gratitude to Dr. P. Shamsher Kumar for his constant motivation and support during the course of my thesis. I enjoyed the personal discussion with him and the time I spent with him during festive seasons.
I would like to acknowledge Mr K. Srinivasu separately for his moral support and motivation, for his constant support and brotherly affection during this course of time which drives me to give my best and have gone out of way to help me with several official matters.

I am thankful to our department Staff Mr. Rama Rao, Mrs. Swathi, Mr. Razak for maintenance of the instruments and their timely help rendered during the course of this work.

My deepest gratitude goes to my family for their unflagging love and support throughout my life; this thesis work is simply impossible without them. I am indebted to my father, Sri. L. Jagannadhams for his care and love. As a father, he worked untiringly to support the family and spared no effort to provide the best possible environment for me to grow up.

Words fail me, to express my feelings towards my brother in law Dr. B. Satya var Prasad for constantly encouraging and motivating me to excel. His enduring support, untiring help and inspiration will always be cherished. He has always been there all the time with me in my ups and downs.

I cannot ask for more from my mother, Smt. L. Lakshmi as she is simply perfect. I have no suitable word that can fully describe her everlasting love and constant support when I encountered difficulties. My sister Mrs. L. Shanmukha Devi, for all her support and encouragement. I consider myself the luckiest in the world to have such a supportive family, standing behind me with their love and encouragement.

CHANDRAMOULI LALAM
