<tr>
<td>1.1</td>
<td>Distribution of sample households according to different socio-economic strata</td>
<td>11</td>
</tr>
<tr>
<td>3.1</td>
<td>Percentage of the households collecting food items from CPRs among different classes and strata in the rural Haryana</td>
<td>51</td>
</tr>
<tr>
<td>3.2</td>
<td>Percentage of the households obtaining fibers from CPRs among different classes and strata in the rural Haryana</td>
<td>53</td>
</tr>
<tr>
<td>3.3</td>
<td>Percentage of the households collecting fuelwood from CPRs in four ecological regions of the rural Haryana</td>
<td>55</td>
</tr>
<tr>
<td>3.4</td>
<td>Percentage of the households collecting cattle dung from CPRs in the four ecological regions of the rural Haryana</td>
<td>56</td>
</tr>
<tr>
<td>3.5</td>
<td>Percentage of the households collecting fodder among different classes and strata in the rural Haryana</td>
<td>57</td>
</tr>
<tr>
<td>3.6</td>
<td>Percentage of the households grazing their livestock on CPRs among four ecological regions of the rural Haryana</td>
<td>59</td>
</tr>
<tr>
<td>3.7</td>
<td>Percentage of the households engaged in stone quarrying on CPRs among different classes and strata in the rural Haryana</td>
<td>60</td>
</tr>
<tr>
<td>3.8</td>
<td>Percentage of the households using common-space for refuse disposal among different classes and strata in the rural Haryana</td>
<td>62</td>
</tr>
<tr>
<td>3.9</td>
<td>Percentage of the households using common-space for fuel/fodder keeping among different classes and strata in the rural Haryana</td>
<td>63</td>

</tbody>
</table>
3.10 Percentage of the households using common space for crop threshing among different economic classes and strata in the rural Haryana ................................................. 64

3.11 Food items collected from CPRs among different classes and strata in the rural Haryana ......................................................... 66

3.12 Fuelwood collected from CPRs among different classes and strata in the rural Haryana ................................................................. 67

3.13 Cattledung collected from CPRs in the four ecological regions of the rural Haryana ................................................................. 68

3.14 Fodder collected from CPRs among different classes and strata in the rural Haryana ................................................................. 69

3.15 Fodder grazed by the livestock of the different economic classes and strata in the rural Haryana ................................................. 70

3.16 Imputed value of the food items obtained from CPRs among the different classes and strata in rural Haryana ................................................. 72

3.17 Imputed value of fibre (bhabar) obtained from CPRs among different classes and strata in the rural Haryana ................................................. 74

3.18 Imputed value of fuelwood collected from CPRs in the four ecological regions of rural Haryana ................................................. 74

3.19 Imputed value of the cattledung collected from CPRs in the four ecological regions of the rural Haryana ................................................. 75

3.20 Imputed value of the fodder collected from the CPRs among different classes and strata in the rural Haryana ................................................. 76

3.21 Imputed value of the fodder grazed by the livestock of different economic classes and strata in the rural Haryana ................................................. 77

3.22 Economic returns from stone quarrying among different classes and strata in rural Haryana ................................................. 78
3.23 Total economic returns from CPRs in four ecological regions of rural Haryana ................. 79

3.24 Percentage of income obtained from different products collected from CPRs and from CPRs-based activities to total economic returns from CPRs during 1994-95 .... 82

3.25 Ratio between agricultural production and total economic returns from CPRs among different farming households in rural Haryana .......... 84

3.26 Employment generated from the food items collection from CPRs among different economic classes and strata in rural Haryana .......... 85

3.27 Employment generated from fuelwood collection from CPRs in four ecological regions of rural Haryana .......... 87

3.28 Employment generated from the dungcake collection from CPRs in four ecological regions of rural Haryana .......... 88

3.29 Employment generated from the fodder collection from CPRs among different economic classes and strata in rural Haryana .......... 89

3.30 Employment generated from the livestock grazing on the CPRs among different economic classes and strata in rural Haryana .......... 91

3.31 Employment generated from stone quarrying on CPRs among different classes and strata in rural the Haryana .......... 92

3.32 Total employment generated by CPRs among the different classes and strata ion the rural Haryana .......... 93

3.33 Percentage of employment generated from collecting of different CPR-products and from CPR based activities to total employment generated by CPRs during 1994-95 .......... 95
4.1 Size and components of CPR-area across different States in Union Territories in India during 1970-71 .......................... 101

4.2 Size and components of CPR-area across different States and Union Territories in India during 1993-94 .......................... 106

4.3 Size and components of CPR-area across different districts in Haryana during 1970-71 .......................... 108

4.4 Size and components of CPR-area across different districts in Haryana during 1993-94 .......................... 110

4.5 Extent of CPR-area across four ecological regions of rural Haryana during late 1960s and early 1990s .......................... 113

4.6 Land use pattern of CPRs in the four ecological regions of rural Haryana during late 1960s .......................... 115

4.7 Land use pattern of CPRs across four ecological regions in rural Haryana during early 1990s .......................... 117

4.8 Ownership pattern of CPRs across four ecological regions in rural Haryana during late 1960s .......................... 121

4.9 Ownership pattern of CPRs in four ecological regions of rural Haryana during early 1990s .......................... 122

4.10 Pattern of possession of CPRs in four ecological regions of rural Haryana during late 1960s .......................... 124

4.11 Pattern of possession of CPRs in four ecological regions of rural Haryana during early 1990s .......................... 126

4.12 Pattern of possession on CPRs by landuse types during late 1960s .......................... 129

4.13 Pattern of possession on CPRs by landuse types during late 1990s .......................... 131

4.14 Common area available for biomass resource supply across different landuse categories in rural Haryana during early 1990s .......................... 134

4.15 Trends in CPR-areas across different States and Union Territories in India (1970-71 to 1993-94) .......................... 142
4.16 Trends in CPR-area in Haryana (1970-71 to 1993-94) ................................................................. 143
4.17 Pattern of trends in CPR-area in four ecological regions of Haryana (late 1960s to early 1990s) ...................... 146
4.18 Trends in the CPR-area under the ownership rights of different institutions in rural Haryana (late 1960s to early 1990s) ................................................. 148
4.19 Trends in CPR-area by their possessors in four ecological regions of rural Haryana (late 1960s to early 1990s) ................................................................. 149
4.20 Trends in the CPR-area available for biomass production across different landuse categories in rural Haryana (late 1960s to early 1990s) .................................................. 150
4.22 The Vegetational conditions in the past as well as at present of the CPR-plots with vernacular indicating their coverage with vegetation in the past ................................................. 154
5.1 Statistical analysis of inter strata variations in the extent of CPR-area in India during 1970-71 and 1993-94 ................................................................. 160
5.2 The factors responsible for inter-district variations in the extent of CPRs in 1970-71 .................................................. 162
5.3 The factors responsible for inter-district variations in the extent of CPRs in 1993-94 .................................................. 162
5.4 The factors responsible for spatial variations in the extent of CPRs in rural Haryana during late 1960s and early 1990s ................................................................. 164
5.5 Dynamics of area amongst CPRs and other uses in India during 1970-71 to 1993-94 ................................................................. 168
5.6 Dynamics of area amongst land under CPRs and under other uses in Haryana: 1970-71 to 1993-94 ................................................................. 171
5.7 Factors responsible for changes in CPR-area during late 1960s early 1990s in four ecological regions of rural Haryana ................................................................. 173
5.19 Fodder provided by CPRs as percentage to total fodder consumed in four ecological regions of rural Haryana .......................................................... 191

5.20 Percentage of households having livestock animal across different socio-economic classes in rural Haryana in 1994-95 ......................................................... 191

5.21 Size of livestock holdings in different socio-economic classes in rural Haryana during 1994-95 .......................................................... 192

5.22 Percentage of households with animal husbandry as main occupation to the total households across different socio-economic classes in rural Haryana during 1966-67 and 1994-95 ......................................................... 195

5.23 Percentage of households with animal husbandry as subsidiary occupation to the total households across different socio-economic classes in rural Haryana during 1966-67 and 1994-95 ......................................................... 196
